Overview
- Resume Writing/  
Interviewing Skills

Most people in our community don't realize the potential right here in our backyard. Sikeston has many surprises, resources and hidden opportunities. We'd like to share a few of these with YOU! Get to know your community and create a network that could lead you down your own path of success.

'Students Observing Area Resources' or S.O.A.R. is an engaging program developed specifically for the SCTC students to realize potential career opportunities Sikeston has to offer as well as make the connections within the community to fulfill a prosperous future. It's designed to open eyes - and quite possibly DOORS - to a successful career right here in our area.

Widely based on the successful 'Leadership Sikeston' program (offered through Sikeston Regional Chamber), students will tour local businesses and interact in face-to-face sessions with business leaders/professionals to examine unique career paths available.

These Wednesday sessions will be offered once a month beginning in October and lasting through April - excluding December. Some sessions will last all day in which case, lunch will be provided. Other sessions will be offered during block times only and will allow for a normal lunch at school.

Roughly 20 students will be chosen by SCTC Staff based on potential interest, attitude and aptitude. These students will gain specific knowledge about each topic to become a future leader and citizen of the Sikeston community or any community they so choose!

Sign up now to spread your wings and S.O.A.R. into a future you may never have thought possible right here in Sikeston!
