

ANABOLIC LABORATORIES

Anabolic Laboratories was developed in the early 1920's by Dr. J.W. Wigelsworth with the concept of nutritional supplementation by dehydrated vegetables reduced to powder form placed into capsules.

In 1924, Anabolic Foods was founded in the farmlands outside of Chicago, Illinois. Anabolic Foods began to concentrate specific active components of natural foods that could help prevent diseases.

Today Anabolic Laboratories continues to lead the field in technological innovation and manufacturing excellence. They have grown from a farm in Illinois with a handful of employees to several hundred employees in their California and Colorado facilities. Anabolic Laboratories are proud to be entering the 4th generation of family, that still own and operate the company today.

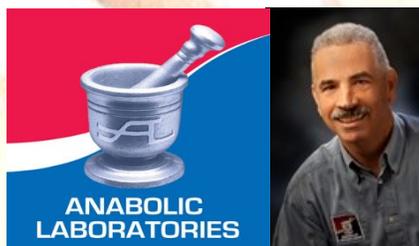

Anabolic Laboratories focus is to provide the highest quality nutritional products and to ensure total clinical satisfaction. They are able to realize this commitment and focus because Anabolic Laboratories is the only manufacturer of "pharmaceutical MADE" nutritional products that directly distributes products to only health care professionals.

2017 marks their 93rd year of supporting Chiropractors with the highest quality nutritional products in the industry. Bob Rosenberg, our point of contact, is in his 21st year of supporting Chiropractic in PA.

As a drug licensed manufacturer of nutritional supplements, Anabolic Laboratories are routinely inspected by the FDA. Their quality assurance and quality control programs exceed the requirements of Nutritional Good Manufacturing Practices. They unconditionally guarantee the potency and purity of their products. Their supplements are also double tested to ensure the absence of gluten.

Anabolic Laboratories has specialty products for all phases of inflammation management as well as various cervical pillows, lumbar cushions, and orthopedic supports.

PCA Members can utilize Anabolic Laboratories with various promotions through out the year and Bob Rosenberg can put together individualized promotions based on volume.
