INSTRUCTIONAL SKILLS

COMMUNICATION #3

Receiving an Alarm

Subject: Fire Department Communications
NFPA 1001 5.2.2

Section 101
Firefighter I

OBJECTIVE

The firefighter trainee shall explain the procedures for receiving an alarm from the fire department dispatcher or a report of an emergency from the public and demonstrate appropriate action.

INSTRUCTIONS - procedures for achieving the objective

Given a call from a dispatcher, or an emergency from the public, you will explain the procedures for receiving an alarm from the dispatcher by verbalizing how the alarm is received. Then, when given a simulated alarm, you will verbally explain the appropriate actions for recording and acknowledging the alarm. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE

The trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Dispatched call (may be simulated) paper and pencil

State Firemen's and Fire Marshals' Association of Texas

COMMUNICATION #4

Receiving a Business or Personal Telephone Call

Subject: Fire Department Communications
NFPA 1001 5.2.2

Section 101
Firefighter I

OBJECTIVE

Receive a telephone call, given a fire department phone, so that procedures for answering the phone are used and the caller's information is relayed.

INSTRUCTIONS - procedures for achieving the objective

Given a fire department business phone and equipment for recording information, you will verbally explain the procedures for receiving a business telephone call on the fire department phone. Then, you will demonstrate the procedures by receiving a simulated telephone call. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE

The trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Dispatched call (may be simulated)

Non-testing personnel to place the simulated call

Equipment used for recording this information as determined by the authority having jurisdiction, (examples: paper and pencil, dry erase board, etc.)

FORCIBLE ENTRY #1

Identify, Carry, and Use the Correct Tool(s)

Subject: Fireground Operations

NFPA 1001 5.3.4

Firefighter I

OBJECTIVE

The firefighter trainee, given a selection of forcible entry tools, shall select, identify, and carry the correct tool(s) as it applies to the individual performance skills listed below. The trainee shall simulate the correct method of opening any of the following doors, windows, walls, and partitions. The trainee will be required to verbalize key points while simulating the individual performance skills. The trainee will be scored on three performance skills.

INSTRUCTIONS: Procedures for achieving the objectives

Given a selection of forcible entry tools, you shall select, identify, and safely carry the correct tool(s) as it applies to the individual performance skills listed below. You shall simulate the correct method of opening any of the following doors, windows, walls, and partitions. **You will be required to verbalize the key points while simulating the individual steps.** You will be scored on three performance skills. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE:

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT:

Pry bar Halligan tool Pick-head axe Flat-head axe Pike pole

Hydraulic extrication tool

K-tool

The firefighter trainee shall accomplish the skills wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, gloves, coat, trousers, boots, and SCBA.

The firefighter trainee, given a selection of forcible entry tools, shall select, identify, and carry the correct tool(s) as it applies to the individual performance skills listed below. The trainee shall simulate the correct method of opening any of the following doors, windows, walls, and partitions. The trainee will be required to verbalize key points while simulating the individual performance skills. The trainee will be scored on three performance skills.

Tool #1 (Doors that open toward the firefighter)	POSSIBLE POINTS	TEST	RETEST
a. Correctly verbalizes the type of door	1		
b. Selects the proper tool(s)	1		
c. Inserts the blade of the tool between the door and jamb near the lock	1		
d. Forces the blade in and against the rabbet or stop	1		
e. Pries the tool bar away from the door to move the door and jamb apart	1		
f. Pulls or pries the door open with another tool until the lock clears the keeper	1		
Tool #2 (Doors that open away from the firefighter where stops are used)			
a. Correctly verbalizes the type of door	1		
b. Selects the proper forcible entry tool(s)	1		
c. Bumps the cutting edge of the tool against the stop to break the paint or varnish.	1		
d. Loosens the stop at the lock or removes the lock completely	1		
e. Forces the blade between the door and jamb	1		
f. Makes initial pry after blade is inserted at least half way	1		
g. With full bite, pries the door away from the jamb	1		
Tool #3 (Doors that open away from the firefighter and have a rabbet jamb)			
a. Correctly verbalizes the type of door	1		
b. Selects the proper forcible entry tool(s)	1		
c. Places the blade of the tool flat against the door and inserts the blade (or tool edge) between the rabbet and the door	1		
d. Makes short pries with the first tool to spread the jamb	1		
e. Works the blade of the second tool between the door and the jamb, hammering the blade well into the opening	1

Stopping the Flow of Water from a Sprinkler Head and
Identifying Type and Temperature Classification

Subject: Fireground Operations

NFPA 1001 5.3.14

Firefighter I

OBJECTIVE

The firefighter trainee shall demonstrate the proper procedure for stopping the flow of water from a sprinkler head using a sprinkler stop or wedge. The trainee shall identify the style of sprinkler head, temperature rating, and the conditions at which the control valve may be closed.

INSTRUCTIONS - procedures for achieving the objective

While wearing full protective clothing, you shall demonstrate the proper procedure for stopping the flow of water from a sprinkler head using a sprinkler stop or wedge. You shall identify and verbalize to the evaluator the style of sprinkler head, temperature rating, and the conditions at which the system control valve may be closed. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE:

The firefighter trainee will not be allowed to review the performance steps at the time of testing. A mock-up for the objective can be created by using a section of pipe with one sprinkler head connected and supplied by a garden hose.

PREPARATION & EQUIPMENT

Sprinkler system or mock-up Open sprinkler head Replacement sprinkler head
Wood wedges or commercially made stopper

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, gloves, coat, trousers, boots and SCBA.

HOSE #1

Single Line Extension and Nozzle Operation

Subject: Fireground Operations

NFPA 1001 5.3.7, 5.3.10

Firefighter I

OBJECTIVE

The firefighter trainee shall demonstrate the proper method of converting and extending a charged 2½" or 3" line into one 1½" or 1¾" attack line and shall operate a nozzle. The trainee shall accomplish the skill in 5 minutes or less.

INSTRUCTIONS - procedures for achieving the objective

While wearing full protective clothing and a Self-Contained Breathing Apparatus (SCBA), you shall demonstrate the proper method of converting and extending a charged hose line into a smaller attack line. You shall demonstrate the open and closed nozzle positions and any stream adjustments that are characteristic of the nozzle. You will have 5 minutes to complete this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed the identified steps. Do you understand these instructions?

EXAMINER NOTE

All extra equipment to perform this evolution shall be placed 5 feet from the coupling of the section to be extended. The extra hose shall be rolled with the female coupling exposed. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

2½" nozzle

1½" adjustable nozzle

100 feet of 1½" or 1¾" hose

50 feet of 2½" or 3" hose Spanner Wrenches Gated Wye

Siamese or similar hose appliance

Hose Clamp

Hydrant or fire truck can be used for water supply

FIREFIGHTERS" to include helmet, coat, trousers, boots, gloves and SCBA. Firefighter trainee will not don face piece or hood.

INSTRUCTIONAL SKILLS

HOSE #2

Demonstrate Proper Connection of Different Size Couplings and Use of Hose Adapters

Subject: Fireground Operations

NFPA 1001 5.3.10

Firefighter I

OBJECTIVE

The firefighter trainee, using two sections of fire hose of different diameters, shall demonstrate connecting the female ends of the hose together using an approved coupling method. The trainee shall accomplish the skill in 1½ minutes or less.

INSTRUCTIONS - procedures for achieving the objective

While wearing full protective clothing and a Self-Contained Breathing Apparatus (SCBA), you shall demonstrate connecting the female ends of two sections of fire hose of different diameters using an approved coupling method. You will have a maximum time limit to complete this skill of 1½ minutes. You will begin on my instruction to start. The skill will end when you state to me that you have completed the identified steps. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

50 feet of 1½" or 1¾" fire hose

50 feet of 2½" or 3" fire hose

Reducer 2½" to 1½" Double male coupling Double female coupling

Assorted hose adapters and appliances

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, gloves, coat, trousers, boots, and SCBA. Gloves shall be optional. Firefighter trainee will not don face piece or hood.

HOSE #3

Procedure for Connecting Hose to a Standpipe

Subject: Fireground Operations

NFPA 1001 5.3.10

Firefighter I

OBJECTIVE

The firefighter trainee, while wearing full protective clothing and a Self-Contained Breathing Apparatus (SCBA), and given a standpipe connection and the proper equipment, shall demonstrate carrying the hose into the building using proper techniques. The trainee shall accomplish the skill in 5 minutes or less.

INSTRUCTIONS - procedures for achieving the objective

While wearing full protective clothing and a SCBA, you shall demonstrate the proper method of carrying hose into a building, connecting it to a standpipe, and advancing the hose to its entire length. You shall complete the mandatory steps while performing this skill. You have 5 minutes to complete this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE

A designated point will be determined by the staff examiner based on the testing site configuration. The staff examiner will designate the fire floor. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Appropriate hose adapters

100 feet of 1 ½" hose or larger Standpipe connection or equivalent Spanner wrenches

Nozzle

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece.

Replacing Burst Section of Hose

Subject: Fireground Operations

NFPA 1001 5.3.10

Firefighter I

OBJECTIVE

The firefighter trainee shall demonstrate the proper method of replacing a burst section of 2 ½" or 3" hose line. The trainee shall accomplish the skill in 6 minutes.

INSTRUCTIONS - procedures for achieving the objective

While wearing full protective clothing and a Self-Contained Breathing Apparatus (SCBA), you shall demonstrate the proper method of replacing a burst section of 2½" or 3" hose line. You shall complete the mandatory steps while performing this skill. You have 6 minutes to complete this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE

All extra equipment to perform this evolution shall be placed 5 feet from the coupling of the section to be replaced. The extra hose shall be rolled with the female coupling exposed. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

300 feet of 2 ½" or 3" hose

Appropriate nozzle for hose size Hose clamp

Spanner wrench set

Hydrant or fire apparatus can be used for water supply.

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece.

HOSE #8

Advance a Charged Attack Line up the Ladder and Operate the Nozzle from the Ladder

Subject: Fireground Operations

NFPA 1001 5.3.10

Firefighter I

OBJECTIVE

The firefighter trainee, given a 24 foot extension ladder in place, with full protective clothing and working with another team member, shall advance a charged attack line 1 ½ inch or larger up the ladder and operate the nozzle from the ladder.

INSTRUCTIONS - procedures for achieving the objective

Given a 24 foot extension ladder in place and working with another team member, you shall advance a charged 1½ inch attack line or larger up the ladder to a minimum height of 14 feet (or 2nd floor landing). You shall operate the nozzle from the ladder only after it is secured in place and you are secured on the ladder with a leg lock. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

SAFETY NOTE

Additional firefighters shall be utilized to heel the ladder and advance the hose as necessary.

PREPARATION & EQUIPMENT

24 foot extension ladder

1 ½" or 2 ½" hose

1 ½" or 2 ½" nozzle

Rope or hose strap

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, gloves, coat, trousers, boots, and SCBA. Trainee shall not don face piece.

Performing Two Types of Hose Carries

Candidate: _____

Notes: _____

Examiner: _____

School: _____

Test Site: _____

The firefighter trainee shall demonstrate the proper method of performing two types of hose carries: the accordion shoulder carry and the single section shoulder loop carry.

	POSSIBLE POINTS	TEST	RETEST
Accordion Shoulder Carry:			
a. Grasps either of the two couplings and places it over the shoulder with the coupling behind the body at approximately waist height	1		
b. Holds the hose in front of the body and, while walking slowly forward, forms a loop that hangs approximately at knee height in front of the body	1		
c. While walking, guides the hose back over the same shoulder to form a loop that hangs at approximately knee height behind the body	1		
d. Walks slowly down the hose, forming alternate loops in front of and behind the body until the entire hose is picked up	1		
e. Carries the hose at least 20 feet in a controlled manner	1		
Single Section Shoulder Loop Carry:			
a. Places one end of the hose over the shoulder so that the coupling hangs at approximately waist height	1		
b. Steps forward to form an approximate 3-foot loop on the ground behind, then picks up the hose at the closest point	1		
c. Raises the loop and lays it over the shoulder without twisting or turning it over (expect loop to have a half-twist) and adjusts the loop so that the bottom is approximately mid-calf	1		
d. Picks up entire length of hose and carries it at least 20 feet in a controlled manner	1

HOSE #15

Hand Laying Supply Line

Subject: Fireground Operations
NFPA 1001 5.3.15

Section 101
Firefighter I

OBJECTIVE

Connect a fire department pumper to a water supply as a member of a team, given supply or intake hose, hose tools, and a fire hydrant or static water source, so that connections are tight and water flow is unobstructed. (NFPA 1001, 5.3.15)

INSTRUCTIONS - procedures for achieving the objective

Given the proper equipment as a member of a team, you shall demonstrate the proper method of hand laying a given size and length of supply line from a pumper to a water source. You will be evaluated on your individual performance. You will begin on my instruction to start. The skill will end when the final performing team member states to me that all of the identified steps have been completed. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Pumper

Sufficient amount of supply hose

Water source

Necessary adapters and tools

The firefighter trainee shall accomplish the skill wearing appropriate PPE.

State Firemen's and Fire Marshals' Association of Texas

LADDERS #2

Working off Ground Ladder with Tools

Subject: Fireground Operations

NFPA 1001 5.3.11, 5.3.12

Firefighter I

OBJECTIVE

The firefighter trainee, without a life safety belt, shall demonstrate the techniques of working from a ground ladder with a fire fighting axe. The trainee shall accomplish the skill in 2 minutes or less.

INSTRUCTIONS - procedures for achieving the objective

Given a designated ladder, you shall demonstrate the techniques of working off a ground ladder with a fire fighting axe. You are required to climb to a height of approximately 8 feet. Prior to climbing, you shall check for proper angle of inclination. After reaching the appropriate height, you shall apply a leg lock and demonstrate working by making four (4) simulated chops with the axe. You have 2 minutes to complete this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINER NOTE

Time will begin when the firefighter trainee begins to check angle of inclination. Time will stop when the firefighter trainee makes four simulated chops with the axe. Unlocking and descending the ladder is not a part of the skill and is not to be timed. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

1 14 ft. ladder (or greater)

1 fire fighting axe

SAFETY NOTE: No heel person will be used. The ladder shall be tied off top and bottom.

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece.

State Firemen's and Fire Marshals' Association of Texas

Low Shoulder Carry, Right Angle Raise of a 14 Foot Single Ladder

Subject: Fireground Operations

NFPA 1001 5.3.6

Firefighter I

OBJECTIVE

The firefighter trainee shall demonstrate the proper procedures to carry, position, and raise a 14 foot single or wall ladder using a low shoulder carry, right angle raise. Starting 100 feet from a designated structure, the trainee shall pick up, carry, and raise a 14 foot ladder to a single story roof or its equivalent. The trainee shall verbalize to the evaluator each step identified in bold print as it is performed. The skill shall be performed in 1½ minutes or less.

INSTRUCTIONS - procedures for achieving the objective

Using a low shoulder carry, you will pick up and carry a 14 foot ladder 100 feet to a designated structure. Using a right angle raise, you will raise the ladder to a single story roof or its equivalent. You shall verbalize the mandatory steps while performing this skill. You will begin on my instruction to start. You have 1½ minutes to complete this skill. The skill will end when you indicate that the ladder is suitable for climbing. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

INSTRUCTIONAL SKILLS

LADDERS #6

Two Firefighter Low-shoulder Carry, Flat Parallel Raise of a 24 Foot Extension Ladder

Subject: Fireground Operations

NFPA 1001 5.3.6

Firefighter I

OBJECTIVE

The firefighter trainee, operating as a team member, shall demonstrate the proper two firefighter pick-up for a Low Shoulder Carry, Flat Parallel Raise of a 24 foot Extension ladder. The firefighter trainee shall perform all the identified steps in less than 3 minutes.

INSTRUCTIONS - procedures for achieving the objective

Using a two firefighter low shoulder carry, you and a designated person will pick up and carry a 24 foot extension ladder 100 feet to a designated structure. You will raise the ladder to a two story window or its equivalent. You will be positioned at the butt end of ladder for this evaluation. You shall verbalize the mandatory steps while performing this skill. When you have reached your destination, you and your team member will raise the ladder using the Right Angle Flat Raise. You will only communicate with the other team member to assure the ladder is properly carried, raised, and extended. You have a maximum time limit to complete this skill of 3 minutes. You will begin on my instructions to start. Time will end when you verbally state that the ladder is suitable for climbing. Do you understand these instructions?

EXAMINERS NOTE:

Instruct the firefighter trainee where the ladder is to be placed and indicate the intended use: climbing, rescue, or ventilation. **Ladder placement and intended use shall be the same for all examinees.** The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

24 ft. extension ladder,

Drill tower, ladder wall, or equivalent

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, gloves, coat, trousers, boots, and SCBA. **Firefighter trainee will not don face piece or hood.**

Test Site: _____

The firefighter trainee, operating as a team member, shall demonstrate the proper two firefighter pick-up for a Low Shoulder Carry, Flat Parallel Raise of a 24 foot Extension ladder. The firefighter trainee shall perform all the identified steps in less than 3 minutes.

The Candidate:	POSSIBLE POINTS	TEST	RETEST
a. Stands next to the ladder at the butt, gives a command to shoulder the ladder. Both individuals, as they stand, will use leg muscles to lift the ladder.	1		
b. Places hand over butt spur, checks for obstructions and verbalizes that area is clear of obstructions. On approach to building, spots the ladder, places the butt on the ground and turns the ladder flat. (The verbalization must be performed prior to raising the ladder.)	1		
c. Utilizes designated raise	1		
d. Heels the ladder by standing on the bottom rung, crouches down to grasp a convenient rung or the beams with both hands, leans back and gives a command to raise the ladder	1		
e. Faces the other member and pivots the ladder to set the fly out (or as stated in the manufacturer's recommendation). The trainee extends the fly to the proper distance and engages pawls	1		
f. After lowering the ladder into place, the trainee checks for proper climbing angle and fly extension, and adequate structural support at tip	1		
g. Ties off the halyard to a run in a manner that will prevent the fly from slipping and that will prevent anyone from tripping while climbing, and assists the other team member. Verbalizes that the ladder is suitable for climbing. Time stops at this point.	1		
h. Completes the skill in the time allotted	1

3- Firefighter Flat Shoulder Carry, Right Angle Flat Raise of a 35 foot Extension Ladder

Subject: Fireground Operations

NFPA 1001 5.3.6, 5.3.12

Firefighter I

OBJECTIVE

Starting 100 feet from a designated two or more story structure, the firefighter trainee and the designated team members shall pick up, carry, and raise a 35 foot extension ladder to a third story window or its equivalent using a three firefighter flat shoulder carry, right angle flat raise. The trainee shall verbalize to the evaluator each step identified in bold print as it is performed. The trainee may only receive communication from the designated persons (team members) to ensure the ladder is properly carried, raised, and extended. The skill shall be performed in 3 minutes or less.

INSTRUCTIONS - procedures for achieving the objective

Using a three firefighter flat shoulder carry, you and designated persons will pick up a 35 foot extension ladder and carry it 100 feet to a designated structure. Using a right angle flat raise, you will raise the ladder to a three story window or its equivalent. You will be required to verbalize key steps and complete the mandatory steps while performing this skill. You and your team members will raise the ladder without laying the ladder on the ground. You will be required to set the ladder with at least three rungs inside the third story window or its equivalent. You will be positioned at the butt end of the ladder for this evaluation. You will only communicate with the other team members to assure the ladder is properly carried, raised, and extended. You will have a maximum time limit to complete this skill of 3 minutes. Time will start on my instructions to start. Time will end when you state that the ladder is suitable for climbing. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

FIREFIGHTER I: RESCUE #1

Conduct a Primary and Secondary Search

Candidate: _____

Notes: _____

Examiner: _____

School: _____

Test Site: _____

The firefighter trainee and a designated team member shall enter a hostile environment and conduct a primary and secondary search for victim(s).

With a rope or hose line:	POSSIBLE POINTS	TEST	RETEST
a. Feels the door and verbalizes that the door must be checked for heat before entering	1		
b. Remains on hands or knees	1		
c. Starts search on outside wall and performs consistent turns (always to right or left)	1		
d. Completely searches one room before moving on to the next room	1		
e. Moves and/or searches behind, on, under all furniture	1		
f. Searches all closets and small crawl spaces	1		
g. After completing room search, marks door or leaves a sign that room has been searched	1		
h. Communicates well with partner	1		
i. Verbalizes that he or she should stop periodically to listen for sounds	1

INSTRUCTIONAL SKILLS

RESCUE #4

Removing Victims from Hazardous Environments

Subject: Fireground Operations

NFPA 1001 5.3.9

Firefighter I

OBJECTIVE

The firefighter trainee, while wearing full protective clothing and given proper equipment, shall demonstrate the proper technique for removal of an injured person from a hazardous environment. The firefighter trainee will demonstrate the techniques of packaging a victim for emergency transportation. The trainee shall accomplish the skill in 9 minutes or less.

INSTRUCTIONS - procedures for achieving the objective

Given the proper equipment, and wearing full protective clothing, you shall demonstrate each of the carries, drags, and the use of a stretcher. Using approved procedures for removing an injured person from a hazardous atmosphere, you will accomplish this skill in 9 minutes. You shall complete the mandatory steps while performing this skill. You will begin on my instruction to start. Each skill will end when you have moved the victim 20 feet from the initial site, and you state to me that you have completed all of the identified steps. Time will end when you have completed all three skills. For skills that require more than one person, extra personnel will be provided. The extra team members cannot discuss or provide any information to the trainee. You will give all directions when the skills require more than one person. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Blanket

Bunker coat

Stretcher or backboard

Individual or rescue mannequin

SCBA, ladders, forcible entry tools, hose lines, flashlight

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, coat, boots, hood, gloves, and trousers. Firefighter trainee will not don face piece or hood.

Securing a Ladder to an Immovable Object

**Subject: General
NFPA 1001 5.1.1**

**Section 101
Firefighter I**

OBJECTIVE

The firefighter trainee shall secure a ladder using a proper technique. The firefighter trainee shall properly secure equipment to an immovable object with the appropriate securing device chosen. The trainee shall accomplish the skill in 4 minutes or less.

INSTRUCTIONS - procedures for achieving the objective

While wearing full protective clothing and a Self-Contained Breathing Apparatus (SCBA), you shall select an appropriate securing device and properly secure the ladder, at either the base or tip, to an immovable object. You will be required to complete the mandatory steps while performing this skill. You will begin on my instruction to start. You will have 4 minutes to complete this skill. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Rope

Rope hose tool/belt

Straight ladder (12 or 14 ft.)

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece or hood.

INSTRUCTIONAL SKILLS

ROPES #3

Forming Elements of a Becket Bend/Sheet Bend

Subject: General
NFPA 1001 5.1.1, 5.1.2

Firefighter I

OBJECTIVE

The firefighter trainee shall demonstrate tying a becket bend (or sheet bend). The trainee shall select the type and length of rope which will be adequate to meet the provisions of this skill. The trainee shall verbally identify five (5) potential elements of rope degradation. The trainee shall verbally identify the working, standing, and running sections of the rope. Because of various acceptable sequential steps in completing a finished knot, the examiner will primarily evaluate the finished product for accuracy by comparing the knot to reference materials. The trainee shall accomplish the skill in 4 minutes or less.

INSTRUCTIONS - procedures for achieving the objective

You will select the type and length of rope which will be adequate to meet this skill. You will verbalize five (5) potential elements of rope degradation. You shall demonstrate tying a becket bend (or sheet bend). I will primarily evaluate the finished product for accuracy by comparing the knot to reference materials. You will also verbally identify the working, standing, and running sections of the rope. You will have 4 minutes to complete this skill. The skill will begin on my instruction to start. The time will stop when you inform me that you have completed the skill. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Two adequate lengths of rope of different diameters.

The firefighter trainee shall accomplish the skill wearing a helmet.

State Firemen's and Fire Marshals' Association of Texas

INSTRUCTIONAL SKILLS

SALVAGE #1

One-Firefighter Salvage Roll and One-Firefighter Salvage Spread

Subject: Fireground Operations

NFPA 1001 5.3.14

Firefighter I

OBJECTIVE

The firefighter trainee, given a salvage cover that is fully opened on a flat surface, shall demonstrate the proper method for rolling a salvage cover using the "one-firefighter roll" method. Upon completion, the trainee will demonstrate a "one firefighter spread" utilizing the rolled salvage cover. The trainee shall accomplish the skill in 8 minutes or less.

INSTRUCTIONS - procedures for achieving the objective

Given a salvage cover that is fully opened on a flat surface, you and a designated partner shall demonstrate the proper method for rolling a salvage cover using the "one- firefighter roll" method. Upon completion, you will demonstrate a "one-firefighter spread" utilizing the rolled salvage cover. During this evaluation, you will give all verbal commands for completion of the steps. You have 8 minutes to complete this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed the identified steps. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Salvage cover

Furniture or similar items

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece or hood.

State Firemen's and Fire Marshals' Association of Texas

FIREFIGHTER I: SALVAGE #1

One-Firefighter Salvage Roll and One-Firefighter Salvage Spread

Candidate: _____ Notes: _____

Examiner: _____

School: _____

Test Site: _____

The firefighter trainee, given a salvage cover that is fully opened on a flat surface, shall demonstrate the proper method for rolling a salvage cover using the "one-firefighter roll" method. Upon completion, the trainee will demonstrate a "one firefighter spread" utilizing the rolled salvage cover. The trainee shall accomplish the skill in 8 minutes or less.

	POSSIBLE POINTS	TEST	RETEST
Roll for one-firefighter spread:			
a. Grasps the cover with the outside hand midway between the center and the edge to be folded, places the other hand as a pivot point midway between the outside hand and the center, and brings the fold over to the center	1		
b. Brings the outside edge over to the center and places it on top of and in line with the previously placed first fold	1		
c. Folds other half of the cover in the same manner as steps a and b	1		
d. Folds over about 12 inches at each end	1		
e. Rolls and compresses one end to complete a tight compact roll	1		
One fire-fighter spread:			
a. Clusters furniture together, then starts at one end of the cluster and unrolls a sufficient amount to cover the end	1		
b. Lays the roll on the object and continues to unroll toward the opposite end	1		
c. Covers the opposite end adequately	1		
d. Stands at one end, grasps the open edges, and opens the sides by snapping hands up and out	1		
e. Opens the other end of the cover over the object in the same manner and straightens the cover and tucks in the edges	1		
f. Completes skill in allotted time	1

The firefighter trainee and a designated partner shall demonstrate the proper method for folding a salvage cover using the "two-firefighter" method. Upon completion, the trainee will demonstrate a "two-firefighter spread" utilizing the previously folded salvage cover. The trainee shall accomplish the skill in 5 minutes or less.

	POSSIBLE POINTS	TEST	RETEST
Fold for two-firefighter spread:			
a. With the cover stretched lengthwise, both firefighters grasp opposite ends of the cover at the center and then pull the cover tightly. Raises the center fold high above the floor and shakes out the wrinkles to form the first half fold and spreads the half fold upon the floor and smoothes out the wrinkles.	1		
b. Folds in half again so open edge sides are on top and smoothes over	1		
c. Carries open end of cover to the opposite end, aligns the edges, shakes the wrinkles out and keeps edges straight	1		
d. Grasps the open ends, places them just short of the folded center fold and continues this process by bringing the open ends over to just short of the folded end	1		
e. Completes the operation by making one more fold in the same manner	1		
Two firefighter spread:			
a. Clusters furniture together, then stretches the cover along one side of the objects and separates the last half fold	1		
b. Makes several accordion folds in the throwing hand	1		
c. Pulls the cover tight between the two firefighters and prepares to swing folded part out	1		
d. Reaches high with the folded end and pitches it up and over the object	1		
e. Straightens the cover and tucks in the edges	1		
f. Completes fold and spread in allotted time	1

SCBA #2

Donning Breathing Apparatus using the **COAT METHOD**

Subject: Fireground Operations

NFPA 1001 5.3.1

Firefighter I

OBJECTIVE

The firefighter trainee, wearing full protective clothing, shall properly don a Self-Contained Breathing Apparatus (SCBA) using the coat method. The trainee will have a maximum time limit of 1 minute.

INSTRUCTIONS - procedures for achieving the objective

With the Self-Contained Breathing Apparatus (SCBA) laying on the ground, back plate up, you shall don the breathing apparatus using the coat method. You shall verbalize the mandatory steps while performing this skill. You have 1 minute to complete the skill. You will begin on my instruction to start. Time will stop when all identified steps have been accomplished and you put your hands in the air to signal that you are finished with this skill. Do you understand these instructions?

Examiners Note

The SCBA shall be ready for this task prior to admitting the trainee into the test area.

The SCBA shall not be touched by the trainee prior to the start of the examination. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Self-Contained Breathing Apparatus unit

As required by NFPA 1001, the firefighter trainee shall begin and end wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, coat, boots, hood, trousers, and gloves.

"The firefighter I should already be wearing full protective clothing prior to the beginning of this SCBA-donning procedure. In addition to fully donning and activating the SCBA, the Fire Fighter I should also replace any personal protective clothing (i.e., gloves, protective hood, helmet, etc.) displaced during the donning procedure and activate the PASS device within the specified 1 min time limit." INSTRUCTIONAL SKILLS

SCBA #3

Donning Breathing Apparatus using the **OVER THE HEAD METHOD**

Subject: Fireground Operations

NFPA 1001 5.3.1

Firefighter I

OBJECTIVE

The firefighter trainee, while wearing full protective clothing, shall demonstrate the procedure for donning the SCBA using the over the head method. The firefighter trainee will have a maximum time limit of 1 minute.

INSTRUCTIONS - procedures for achieving the objective

With the Self-Contained Breathing Apparatus (SCBA) laying on the ground, back plate up, you shall don the breathing apparatus using the over the head method. You have 1 minute to complete the skill. You will begin on my instruction to start. Time will stop when all identified steps have been accomplished and you put your hands in the air to signal that you are finished with this skill. Do you understand these instructions?

EXAMINERS NOTE

The SCBA shall be ready for this skill prior to admitting the trainee into the test area. The SCBA shall not be touched by the trainee prior to the start of the examination. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Self-Contained Breathing Apparatus unit

As required by and NFPA 1001, the firefighter trainee shall begin and end wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, coat, boots, hood, trousers, and gloves.

The firefighter I should already be wearing full protective clothing prior to the beginning of this SCBA-donning procedure. In addition to fully donning and activating the SCBA, the Firefighter I should also replace any personal protective clothing (i.e., gloves, protective hood, helmet, etc.) displaced during the donning procedure and activate the PASS device within the specified 1 min time limit. (NFPA 1001, A-5.3.1)

Procedure for Self-Contained Breathing Apparatus By-pass Operation

Subject: Fireground Operations

NFPA 1001 5.3.1

Firefighter I

OBJECTIVE

The firefighter trainee, wearing full protective clothing, shall properly don a Self-Contained Breathing Apparatus (SCBA) and demonstrate emergency procedures to be used in the event of SCBA system failure. You will have a maximum time limit of 3 minutes to complete the skill.

INSTRUCTIONS - procedures for achieving the objective

While wearing full protective clothing, you shall correctly don and place the SCBA into full operation with tank cylinder and main line valves fully opened and by-pass valve closed. You will demonstrate emergency procedures to be used in the event of regulator failure, face piece failure, and conservation of air during emergency procedures. You will have a maximum time limit of 3 minutes to complete the skill. You shall verbalize the mandatory steps while performing this skill. You will begin on my instruction to start. Time will stop when all identified steps have been accomplished and you put your hands in the air to signal that you are finished with this skill. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Self-Contained Breathing Apparatus unit

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, coat, boots, hood, gloves, and trousers.

INSTRUCTIONAL SKILLS

SCBA #14

Removal of Victims

Subject: Fireground Operations

NFPA 1001 5.3.9

Firefighter I

OBJECTIVE

The firefighter trainee, wearing full protective clothing with Self Contained Breathing Apparatus (SCBA), shall demonstrate three different rescues, a firefighter with non-functioning respiratory protection, a firefighter with respiratory protection and one civilian. The simulated victims shall weigh between 150-200 pounds, and must be moved a minimum of 20 feet.

INSTRUCTIONS – procedures for achieving the objective

While wearing full protective clothing and Self Contained Breathing Apparatus (SCBA), you will locate victims weighing between 150-200 pounds. You will locate and move the victims to a designated area. There will be three victims, one victim will simulate a firefighter with functioning SCBA protection, one victim will simulate a firefighter with non-functioning SCBA protection, and one will be a civilian. You will verbally state that you have assessed the area for tenability. You must accomplish this skill without compromising your own respiratory protection. You will begin on my instruction to start. The skill will end when you state to me you have finished all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Self-Contained Breathing Apparatus unit

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, hood, gloves, coat, trousers, boots and SCBA.

INSTRUCTIONAL SKILLS

VENTILATION #1

Sounding and Ventilating a Roof

Subject: Fireground Operations

NFPA 1001 5.3.11, 5.3.12

Firefighter I

OBJECTIVE

The firefighter trainee, given the necessary equipment, shall demonstrate sounding a roof for structural integrity and demonstrate ventilating both pitched and flat roofs.

INSTRUCTIONS: Procedures for achieving the objectives

Standing on the ground near the designated area, you shall climb a ladder to the edge of the roof and use an axe to sound the roof for structural integrity. Using the roof ladder, you shall climb to a designated position on the roof and cut a 4 foot X 4 foot opening at the place indicated. The hole shall be continuously cut until all sides are cut and the cut-out falls to the ground. You will be required to both verbalize key steps and complete mandatory steps while performing this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Roof (may be simulated) Pick-head axe

14 foot roof ladder

24 foot extension ladder

Extra 4 foot x 8 foot sheets of wood

Ventilation Saw/ Chain Saw, K-12 Saw

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include, helmet, gloves, coat, trousers, boots, hood, and SCBA.

OBJECTIVE

Given an ignitable liquid fire scenario, the firefighter trainee will select the appropriate foam concentrate for the fuel involved. The trainee shall demonstrate the proper application of a foam stream on the simulated fire for extinguishment.

INSTRUCTIONS - procedures for achieving the objective

Given an ignitable liquid fire scenario, you will select the appropriate foam concentrate for the fuel involved. You shall demonstrate the proper application of a foam stream on the **simulated** fire for extinguishment. The skill will commence on my instruction to start. The skill will end when all of the identified steps have been accomplished and you state to me that you have completed the skill. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Foam concentrate (assorted concentrations) Foam eductor

Attack hose line

Nozzle

Pumper apparatus

Simulated burning fuel area in or around walls or other obstructions

The firefighter trainee shall accomplish the skill wearing "**FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS**" to include helmet, gloves, coat, trousers, boots, and SCBA.

INSTRUCTIONAL SKILLS

FIREFIGHTER II: FIRE STREAMS #2

Applying Foam

Candidate: _____

Notes: _____

Examiner: _____

School: _____

Test Site: _____

Given an ignitable liquid fire scenario, the firefighter trainee will select the appropriate foam concentrate for the fuel involved. The trainee shall demonstrate the proper application of a foam stream on the simulated fire for extinguishment.

The Candidate:	POSSIBLE POINTS	TEST	RETEST
a. Ensures that the foam is compatible with the fuel burning	1		
b. Opens nozzle to ensure generation of foam	1		
c. Advances to a safe distance from the fire	1		
d. Applies agent on the fuel in an indirect method: <ol style="list-style-type: none"> 1. Bounces agent off walls or other obstructions 2. Applies the agent in front of the burning fuel and "rolls" the agent onto the fuel 3. In the absence of a wall or obstruction, gently lobs the agent onto the burning liquid 	1		
e. Applies the agent in a sufficient rate and amount to extinguish the fuel	1		
f. Takes care not to approach too close to the burning fuel	1		
g. Takes care not to disturb the foam blanket or splash fuel with direct application of the foam stream	1		
TOTAL POINTS:	7		

Points needed to pass: 5

INSTRUCTIONAL SKILLS

HOSE #9

Select and Locate the Proper Nozzles and Size of Hose

Subject: Fireground Operations

NFPA 1001 6.3.2

Firefighter II

OBJECTIVE

The firefighter trainee, given three different simulated fire situations, shall select the proper nozzles, adapters, appliances and size of hose to extinguish or control the situation.

INSTRUCTIONS - procedures for achieving the objective

You shall select the proper size nozzle, hose, adapters, and appliances for a fire attack on three different fire situations. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

150' of 1 ½" and 2 ½" hose

Spanner

Foam eductor

Gated "Y"

Supply hose 2 ½" or larger

Adapter for connection to pumper or hydrant

1 ½" or 2 ½" nozzle

1 ½" combination nozzle

RESCUE #2

Life Safety Harness Inspection

Subject: Rescue Operations

NFPA 1001 6.4.2

Firefighter II

OBJECTIVE

The firefighter trainee, given a specific life safety harness, shall properly inspect the harness for damage according to correct procedures for that harness. The trainee shall verbalize to the examiner four (4) conditions that would indicate damage and possible removal from service. The trainee shall accomplish all of the identified steps in less than 3 minutes.

INSTRUCTIONS - procedures for achieving the objective

You shall inspect a life safety harness for damage. You shall verbalize the mandatory steps while performing this skill. You have 3 minutes to accomplish this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

RESCUE #6

Lowering a Victim with a Rope Rescue System

Subject: Rescue Operations

NFPA 1001 6.4.2

Firefighter II

OBJECTIVE

The firefighter trainee and designated team members shall demonstrate properly raising and lowering a person with a rope rescue system.

INSTRUCTIONS - procedures for achieving the objective

You and designated team members, given appropriate rope rescue equipment, will demonstrate properly raising and lowering a person a minimum of 3 feet, using an approved rope rescue method. You will be required to complete the mandatory steps while performing this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Various rope rescue equipment suitable for evolution

24 foot ladder or larger

The firefighter trainee shall accomplish the skill wearing a helmet, gloves, trousers, and boots.
