PROGRAM

- 6:30** **Doors open – Legacy Grand Ballroom**
- 7:00** **Program welcome** – Tech Titans CEO Bill Sproull, emcee; Gala Chair Deborah Sawyer, ZRG Partners; Tech Titans Chair Barbara Baffer, Ericsson
Presenting sponsor remarks – MediaKind
Dinner
- 8:00** **Tech Titan of the Future**
 University Level – presented by Huawei Technologies
 High School Level – presented by VLSIP Technologies
STEM Initiative – presented by State Farm
Hall of Fame Induction – ZRG Partners
Fast Tech Awards Presentation
presented by Crowe, Comerica Bank Tech & Life Sciences, Dallas Business Journal
Corporate CEO – presented by Masergy
Technology Inventor – presented by Dassault Systemes
Corporate CIO – presented by Cigniti
Technology Advocate – presented by Nokia
Corporate CTO – presented by Deloitte
Technology Adopter – presented by Thomson Reuters
Community Hero and Investment Catalyst – presented by Axxess and CyrusOne
Emerging Company Innovation – presented by Fujitsu
Corporate Innovation – presented by Ericsson
Emerging Company CEO – presented by RealPage
- 9:15** **Gala Closing Remarks** - Bill Sproull and Deborah Sawyer

GALA CHAIR

Deborah Sawyer, ZRG

It's the most wonderful (summer) night of the year!

On behalf of the Tech Titans Board of Directors, the 2018 Gala Committee and our title sponsor – MediaKind – welcome to the 18th Annual Tech Titans Awards Gala.

For the past 18 years, we have taken pause one night out of the year to celebrate everyone involved in the North Texas technology community and to further celebrate the innovation of our finalists and award winners. That night is tonight.

As in years past, our judges had an unenviable task: how do you choose finalists from a pool of over 160 elite nominees? This year was another record-breaking year of nominations, with an average 12.5 nominees per category.

Tonight, we honor our 2018 finalists – a first-class group of innovators across multiple industries in North Texas.

The Gala Committee worked tirelessly planning this event. I would like to thank the hard work of these dedicated volunteers to make this a “morebetter-funner” night. Thank you!

The awards gala would not be possible without our sponsors who are listed in this program and here in force this evening. Please join me in thanking the sponsors of the 18th Annual Tech Titans Awards Gala for their commitment to innovation and to our organization.

Enjoy your evening! And join us on social media: [#TechTitansAwards](https://twitter.com/TechTitansAwards)

UNIVERSITY

Tech Titan of the Future – University Level

Recognizes an accredited educational institution in the DFW Metroplex that encourages and supports students to choose engineering and technology-related disciplines as a preferred career path. This award category spotlights DFW-area higher educational institutions' technology-related curricula and incentives to perpetuate tech-related knowledge transfer.

- **Texas A&M University – Commerce, Data Analytics Faceoff** organizes a series of data analytics competitions for Texas A&M University-Commerce students to help them discover how to use data analytics in the real world. Students are given real world data and are encouraged to use the models and systems learned in classes to help the data owners gain more insights about their businesses.
- **University of Texas at Arlington, EplCMavs** is a UTA program that provides resources and training to entrepreneurial students and faculty, giving them access to experienced entrepreneurs and experts in order to foster and promote startups as a career path. EplCMavs includes weekly interactive seminars during the fall and spring semesters and a more in-depth hands-on workshop during the summer.
- **University of Texas at Dallas, The Connect Inspire Guide Women in Technology** program encourages incoming female students at all levels to confidently pursue careers in STEAM (science, technology, engineering, art and math). Dr. Janell Straach is the leader and founder of this umbrella program that encompasses a number of initiatives that embolden young women and develop a community of support to assist these young women and help build their confidence.
- **University of North Texas** Dr. Renee Bryce is the founder of the Bug Catcher and Bug Wars software testing competitions that have engaged about 2,000 middle-school and high-school students, along with UNT freshmen to encourage them to pursue computer science as a major.

Congratulations 2018 Tech Titans!

Huawei applauds the Tech Titans of the Future — instructors who are shaping the future and sharing our goal of a connected world of endless possibilities. www.huawei.com/us

HIGH SCHOOL

Tech Titan of the Future – High-School Level

Recognizes a DFW Metroplex high school (grades 9-12) math or science teacher for development and implementation of an innovative teaching technique or program that inspires student interest regarding further educational and/or career pursuits in science, technology, engineering or math.

- **Jerry Grizzle, Plano ISD**, uses guided inquiry and a “labs first” emphasis to engage students in critical thinking and problem-solving. This year, participation in his class includes 50 percent girls.
- **Morris Goldade, Wylie ISD**, serves as the district’s technology trainer to incorporate the latest technologies into curriculum. He sponsors the Robotics Club and National Technical Honor Society, and his new robotics program is already adding more classes and teachers.
- **Douglas Lee, Dallas International School**, helped build participation in computer science and engineering through the CES project, which immersed students in cutting edge technology. Students traveled to the Consumer Electronics Show, interviewed designers and engineers, and wrote product reviews.
- **Kristin Shapiro, Plano ISD**, uses project-based learning along with Google tools to encourage her students in science-exploration research techniques and hands-on experimentation. By bridging these skills across all classes, students are preparing for jobs that do not yet exist.

VLSIP Technologies

An Engineering Foundry for Electronics

Congratulations 2018 Tech Titans!

Proud sponsor of the Tech Titans of the Future - High School Level

VLSIP is a global leader in enhancing microchip and electronic module solutions

High School

STEM Tech Titans and the future STEM workforce

An educated workforce is priceless. And critical.

Together, we're building the future workforce and the next generation of Tech Titans Award recipients. Our summer camps and school-year educational events introduce kids to their potential futures: working in rewarding, fun STEM careers. They participate in experiential learning, meet STEM professionals and tour companies.

Tech Titans STEM initiative focus areas include:

- Designing classroom modules to introduce each of our Tech Titans forum topics
- Assisting students with career preparation
- Connecting students with experiential learning and job shadowing
- Developing additional STEM camps and events

We need you!

Volunteer. Join the STEM Talent Team or register as an outreach volunteer.

Invest. Sponsor a Tech Titans STEM Day or STEM camp. Share your experience with students; host an event and demonstrate STEM careers in action.

Promote our STEM video contest. Sponsored by State Farm, films created by young contestants become part of the Tech Titans tool kit: compelling content that volunteers use with students.

Connect with one kid, change a life, change the world. Contact Tech Titans STEM Director Dave Galley at dave@techtitans.org.

www.techtitans.org/stem

Congratulations to the 2018 Tech Titans Award Winners!

State Farm® is excited to support the next generation of STEM professionals.

Here to help life go right.®

State Farm, Bloomington, IL

CORPORATE CEO

Steve Winn, RealPage

Stephen T. Winn has served as RealPage CEO, chairman of the board, and a member of board of directors since November 1998.

Prior to RealPage, Winn served in various executive positions, including president of Research Institute of America, a provider of information services to the accounting industry and a wholly owned subsidiary of Thomson Reuters Corporation, and president and CEO of Computer Language Research Inc., a publicly traded company focused on tax compliance, tax research and accounting software, which was acquired by Thomson Reuters Corporation.

Winn was one of five people recognized by the National Apartment Association as a leader in the multifamily industry. Accounting Today recognized him as one of the 100 most influential people. Winn was an Ernst & Young Entrepreneur of the Year 2012 Southwest Area North Award recipient.

He is an active member of the National Apartment Association and National Multifamily Housing Council.

Winn received his Bachelor of Science in electrical engineering from the University of Texas at Austin and his Master of Science in management from Stanford University.

REALPAGE®
Outperform

Congratulations on your commitment to innovate

NOKIA

Corporate CEO

HALL OF FAME Romelia Flores, IBM

One of IBM's top technologists worldwide, Romelia Flores earned the titles of IBM Distinguished Engineer in 2008 – one of just 700 worldwide – and IBM Master Inventor in 2009, a title afforded to IBM inventors when significant patent grants are awarded by the United States Patent and Trademark Office. She holds 40 patents with an additional 30 patents pending.

During her 36-year career with IBM, she has worked with many of the company's largest clients around technology innovation. A member of the IBM Global Solution Center located in the Dallas/Fort Worth area, Romelia has collaborated with clients in the banking, insurance, energy and utilities industries, and with the government sector. That collaboration focused on IBM's artificial intelligence (Watson Cognitive), blockchain, design thinking and Agile technology, and the creation of business use cases and first-of-a-kind prototypes with those clients.

Continued on next page

Congratulations

2018 Hall of Fame Inductee

ROMELIA FLORES

ZRG Partners. Invested in the future of Technology.

zrgpartners.com

HALL OF FAME

Romelia Flores has personally trained thousands of IBMers, including many early-career professionals, and led more than 30 Design Thinking Sessions. During the past six years she has trained 50 new IBM engineers, and estimates that 35 of those subsequently filed their first patent applications. "I started noticing very quickly that young folks get bored with technical things, but they thrive when I tell them I'm patenting," Romelia Flores, *The Dallas Morning News*, July 22, 2018. She's also authored hundreds of technical documents.

She speaks frequently at conferences, as a keynote and panelist. In 2016 she was the first female keynote at IEEE Metrocon 2016.

Romelia is a frequent university guest lecturer and most recently is advising MBA students about leveraging Design Thinking techniques for gaining insights into systems design with their clients. University professors and students at Baylor University, University of Texas at Austin, University of Texas at Dallas, Texas Christian University, Southern Methodist University and the University of Texas at El Paso frequently request subsequent collaboration opportunities and return engagements.

She earned a bachelor of computer science degree from the University of Texas at Austin. Her education included a summer internship at IBM's Austin development lab. Baylor named her an Honorary Alumnus in 2014.

Recognition of her achievements include induction into the International Women's Forum in 2018, 2017 Innotech IT Executive of the Year, a 2016 Lifetime Achievement award from the Great Minds in STEM, a 2016 IBM Academy of Technology Lifetime Achievement Award and *The Dallas Business Journal* 2016 Women in Technology Award.

FINALISTS

Technology Inventors

Recognizes the pioneering accomplishments of a person, team or group responsible for the creation of breakthrough ideas, processes or products which have advanced the discipline(s) of the arts, education, electronics, energy, engineering, environment, medicine and/or science. The nominee is with a DFW Metroplex company or institution.

- **Ali Abolmaali, The University of Texas at Arlington** – Dr. Ali Abolmaali, professor of structural applied mechanics and chair of the Civil Engineering Department, and his research team have developed a state-of-the-art algorithm and related technology for conversion of electronic pulse data from laser and sonar robotic equipment for sewer pipeline inspection, to a graphical interface identifying service life prediction and preemptive pipeline failure.
- **Patrick Antaki, Evergaze Technology LLC** – Patrick Antaki and his team of technology engineers and electro-optical system experts invented the seeBOOST electro-optical device to help those with low vision regain sight, coupling electronics and optics into a wearable “normal” device, which addresses vision loss from age-related macular degeneration (AMD) and diabetic retinopathy.
- **Robert Atkins, BALANCED Media | Technology** – Video game developer Robert Atkins as BALANCED Media|Technology (BMT) is harnessing the massive computing and problem-solving potential of the 2 billion-strong gaming community to solve some of world’s biggest issues. Through its proprietary crowdsourcing platform, HEWMEN, BMT is integrating raw computer processing power with human intuition to solve complex, data-centric problems far below traditional processing costs.
- **Rahul Saini, Zyx Labs** – Rahul Saini is the system architect of the most complicated and advanced implant ever made to restore vision for blind patients with retinitis pigmentosa and advanced macular degeneration. He has multiple patents awarded/pending for this wireless, batteryless implant that is the size of a grain of rice.

Corporate Innovation

Recognizes a technology company for outstanding innovation and unique accomplishments through recent or potential breakthrough technology or approach within the technology industry. The company has a corporate headquarters or a division office in the DFW Metroplex. The company has 2017 operating revenues of more than \$200 million.

- **FirstNet powered by AT&T** is the country’s first nationwide public safety communications platform dedicated to first responders in times of need. Built with AT&T, in public-private partnership with the First Responder Network Authority, FirstNet is bringing public safety a much-needed technology upgrade.

Continued on next page

FINALISTS

- **Fujitsu Network Communications and AT&T** The Open ROADM Multisource Agreement (MSA) was founded by four companies including Fujitsu to develop industry-wide specifications for open network ecosystems. Platforms that are designed based on the principles of openness, scalability and interoperability will translate to cost savings, faster services deployment and improved network performance – and ultimately a superior customer experience.
- **Nokia's** multi-band power amplifier and DAPD solution for next generation wireless systems allows up to three base stations to operate from one radio box instead of having a separate radio box for each band. This capability will have tremendous benefits for the environment, service providers and overall better quality of cell phone service.
- **Tyler Technologies** envisions Connected Communities, which feature networks allowing departments to access and share data across agencies and jurisdictional boundaries. These integrated solutions increase efficiencies, improve public safety resources and enable access over any technology more cost effectively.

Designing your 5G future

New technology, new services,
new business models

Congratulations to Javier Garcia Gomez for being
selected as a 2018 Tech Titan CTO finalist.

[ericsson.com/
networks](https://ericsson.com/networks)

FINALISTS

Corporate CIO

Recognizes the Chief Information Officer (CIO) of a DFW Metroplex based technology or non-technology company for exceptional technical leadership that fosters the deployment of Information Technology (IT) resulting in significant value for the company.

- **Pamela Arora, Children's Health in Dallas** – CIO Pamela Arora led the implementation of an enterprise-wide electronic medical record that helps make life better for children by extending reach into the community, gain efficiencies in care delivery processes, prevent unnecessary transports and testing and deliver more informed care to patients.
- **Leah Miller, Medical City Healthcare** – CIO Leah Miller leverages technology to solve organizational challenges, enable market expansion, create competitive advantage, and – above all else – support the company's mission to care for and improve human life. Through the recent Medical City Virtual Care project, Leah effectively positioned IT as a contributor to both division strategy and to the bottom line.
- **Sherif Mityas, TGI Fridays** – CIO and Chief Strategy Officer Sherif Mityas is extending artificial intelligence into the restaurant business to increase the To-Go business, improve guest experience and reduce staff turnover.
- **Barry Shurkey, NTT DATA Services** – CIO Barry Shurkey led the \$3B acquisition of Dell Services to improve NTT DATA's ability to serve clients through its global presence and gain a greater market share, while also expanding the number of solutions the company could offer.

CONGRATULATIONS TO

TechTitans®

AWARDS FINALISTS AND WINNERS

FINALISTS

Technology Adopter

Recognizes a company with U.S. headquarters in the DFW Metroplex whose core business is not a technology product for outstanding adoption and application of innovative technologies that successfully change and impact business results.

- **Anderson Merchandisers** developed DASH, a fully customizable system that houses multiple applications to manage business on both a corporate and field level. It is used by clients and leadership, allowing an immediate view into their business. Clients can view the real-time status of tasks, photos of completed activities, activity exceptions, product inventory and retail analytics.
- **Callbox Storage, LLC** has created and implemented a web platform that allows it to more efficiently store customers' belongings and allows them more visibility into the items they've stored. Through the web application, customers' items are tracked from pick up to facility and back again. Customers are also provided real-time visibility of items stored and the total volume stored.
- **Property Damage Appraisers, Inc.** has implemented technological and service advancements that shorten appraisal cycle times from more than two days to an industry-leading average of 1.43 business days. Faster cycle times empower insurance carrier and third-party administrator partners to settle claims quickly to get their customers back on the road and back to business.
- **TGI Fridays** is extending artificial intelligence into the restaurant business to increase To-Go business, optimize operations to drive profitability, improve guest experience and reduce staff turnover.

FINALISTS

Technology Advocate

Recognizes a DFW Metroplex individual or company whose core business is not a technology product for outstanding leadership in championing, assisting, advancing or accelerating the performance of the technology industry in North Texas.

- **Jennifer Bartkowski**, CEO of Girl Scouts of Northeast Texas. As the largest girl-serving leadership development program in northeast Texas, GSNETX is helping make a substantial impact on the future of the girls choosing STEM careers. The organization raised \$14 million to build the STEM Center of Excellence, a high-touch, high-tech learning laboratory. Everything at the camp integrates STEM learning in a fun and engaging way. Immersive experiences and amenities connect girls to both nature and STEM activities, building confidence in today's young women so they can be the STEM leaders of tomorrow.
- **Will Long**, The CyberAid program was established by HITRUST in coordination with industry leaders to help smaller healthcare organizations (with fewer than 75 employees) address information protection challenges and cyber risks--specifically selecting, acquiring, implementing and operating key components of their cyber defenses. The program identifies and evaluates solutions that can be implemented, managed and operated cost effectively by organizations with limited technical and financial resources, while ensuring solutions provide an effective level of cyber threat protection.
- **Russell Medina**, NPower, is leading efforts to assist veterans and their spouses launch their technology careers through their program of social support, IT, coding and cyber security training. Russ has cultivated a solid corporate volunteer network that has provided a program of professional development such as mentoring, soft skills training, resume building, mock interviews and internships.
- **David Sym-Smith**, Mobility Ventures, is a CEO, founder, investor, mentor, and advisor to multiple corporations and startups. He provides personal mentorship at multiple incubators, in-person training and financial assistance. David gives entrepreneurs/start-ups access to leaders who have the resources to support their business goals and the personal knowledge and experiences to educate entrepreneurs on what it takes to launch, manage and grow a successful business.

ANSWERS TODAY FOR

the answer company™
THOMSON REUTERS®

FINALISTS

Corporate CTO

Recognizes the Corporate Technology or Science Officer of a DFW Metroplex based technology or non-technology company for exceptional technical leadership that fostered the development of new technology resulting in significant value for the company.

- **Matt Clark, Valify**, leads the team responsible for developing the patent-pending algorithms that transformed the landscape of purchased services expense management in the healthcare industry. Valify's breakthrough technology provides an end-to-end purchased services solution for organizations to proactively manage expenses, increase staff productivity, and realize significant savings.
- **Javier Garcia-Gomez, Ericsson**, and his team lead the technical engagement and create technology alignment between Ericsson and AT&T. Garcia-Gomez' team is responsible for driving the strategy and standardization of a new radio access architecture to separate the radio application control and user plane, and to create a new way to build radio networks to further improve spectral efficiency.
- **Anthony Goonetilleke, Amdocs**, group president and CTO, is in charge of the company's technology, product and R&D. He is leading the evolution of Amdocs' product portfolio to embrace open-source technology, develop cloud-native offerings, introduce microservices technology and strengthen its partner ecosystem – all of which drive agility in the delivery of end-to-end solutions, shrinking deployment timelines from years to months.
- **Kim Keating, AT&T**, vice president of data science, is a critical leader in AT&T's Chief Data Office. Through her leadership and vision, Kim's teams transform and data-power AT&T with advanced analytics, machine learning and artificial intelligence. Her teams leverage vast amounts of data to provide insights and answers to critical business questions.

Corporate CTO Finalists

FINALISTS

Investment Catalyst

Recognizes an organization for completing a significant technology-related investment transaction that will impact and deliver significant long-term economic prosperity for the DFW Metroplex.

- **Winner: Bryan Chambers**, The Institute for Innovation and Entrepreneurship - UT Dallas. The UT Dallas Seed Fund invests in startups founded by UTD students, faculty, staff and alumni. Created in 2017, the fund raised \$350,000 in its first year. To-date, Seed Fund has invested \$125,000 in four UT Dallas-affiliated early-stage startups.
- **Kedreon Cole, LaunchPad City**, is a Frisco-based business incubator focused on building community, partnerships and investments in sports technology and esports. LaunchPad is now partnered with Stadia Ventures, an esports-focused accelerator putting a \$25M investment fund to work in this fast-growing industry.
- **David Matthews, REVTECH**, Retail Technology Ventures, is a seed capital fund and accelerator program for tech innovation in the retail, restaurant and hospitality industries. Founded in 2011, RevTech has helped 33 companies get funded, with total capital formation of more than \$15 million and more than 220 jobs created to-date.
- **Perot Jain** is a Dallas-based venture capital firm and active participant in building the Dallas entrepreneurship and start-up ecosystem. Founded in 2014, their investments focus on B2B companies developing disruptive technologies. One success story is Booster Fuels who incubated at AllianceTexas and raised a \$20 million Series B round in 2017.

DATA CENTER SOLUTIONS AS BIG AS TEXAS

Texas-sized scalability and proven technology make CyrusOne the lone star of the data center industry and the perfect partner for enterprise production and disaster recovery. Enjoy flexible, scalable solutions, innovative technologies, and exceptional customer service from the global enterprise data center provider proud to call Dallas home.

- ★ Scalable, flexible solutions for right-sized business needs
- ★ Proven, innovative technology delivering money-saving efficiencies
- ★ 24/7 exceptional service provided by CyrusOne experts
- ★ Over 45 Data Centers Worldwide

FINALISTS

Emerging Company Innovation

Recognizes a technology company for outstanding innovation and unique accomplishments through recent or potential breakthrough technology or approach within the technology industry. The company is headquartered in the DFW Metroplex and has 2017 operating revenues of at least \$2 million but no more than \$200 million.

- **Bottle Rocket** builds the highest quality connected lifestyle experiences for the world's most discriminating brands.
- **5miles** is a hyper local marketplace. It's like the best of Craigslist meets Nextdoor with safety and security enhancements that no other marketplace has. With block chain technology, 5miles is working to decentralize and democratize e-commerce.
- **Pieces Technologies** is focused on improving patients' lives and outcomes in the hospital and the community.
- **SevenTablets** is a Dallas-based digital transformation company that focuses on mobile, augmented reality and machine learning technologies.

Emerging Company CEO

Recognizes the CEO of a technology company headquartered in the DFW Metroplex with 2017 operating revenues of at least \$2 million but no more than \$200 million.

- **Ruben Amarasingham, MD, Pieces Technologies**, founder and CEO, Dr. Amarasingham is a national expert in the application of informatics concepts in healthcare and public health, and the use of innovative care models to reduce disparities, improve quality, and lower costs. He founded Pieces to advance health at every decision throughout the patient journey. Pieces Tech solutions allow health systems and social service organizations the ability to discover, predict, and share information in order to improve clinical and operational outcomes.
- **Christopher Godfrey, Bloodbuy**, founder, an online marketplace that connects the people that need blood products with those that have them. The goal is to achieve a much higher level of efficiency around the blood supply so the blood products can be accessed at a lower cost and a greater frequency.
- **Vanessa Ogle, Enseo, Inc.**, founder and CEO, redirected her business focus from the airline industry to hospitality after 9/11. Enseo powers and manages the world's largest fully-monitored out-of-home media network, reaching more than 50 million people annually. With 18 years in hospitality, Enseo is the fastest growing technology-based services provider delivering sustainable innovation for the largest hotel groups worldwide.
- **Toni Portmann, Distribution Hospitality, Intelligent Systems (DHISCO)**, connects online travel agents all over the world to the largest hoteliers on the globe. It provides the hospitality industry innovative distribution technology that enables hotel bookings around the globe.

FINALISTS

Community Hero Award

Recognizes an individual within the technology industry for their outstanding achievements in community involvement.

- **Winner: Bill Warren, executive chairman of the board, Reflect Systems**, is a lifetime advocate for children with special needs. He led the capital campaign to build The Warren Center headquarters in Richardson where 900 children are served each month. He was also pivotal in launching the Fantasy Football Draft Night event which has raised millions of dollars during 25 years for The Warren Center.
- **Tresia Eaves, partner and director, CGI**, has a passion for helping veterans transition into technology careers. Since partnering with nonprofit NPower North Texas in 2012, she's spearheaded successful programs like "Speed Mentoring" and developed training curriculum. More than 400 veterans have graduated from NPower training programs; 90 percent are employed within six months of graduation.
- **Bob Sawler, VP business development, The Realtime Group**, and his family feed hungry kids through Food for the Soul, the nonprofit they established. Their initiatives include the Backpack Program which ensures kids eat during weekends, and the Pregame Meal program for student athletes. To-date, Food for the Soul has provided more than 1.3 million meals in the Metroplex.
- **Chris Skaggs, VP talent and brand, TSP**, and his wife, Amy, founded the nonprofit Leighton's Gift in 2013. Their mission is keeping parents connected with their premature babies in neonatal units by providing bedside webcams. To-date, they've raised more than \$100,000 and funded installation of 45 webcams at Texas Health Presbyterian Hospital Plano.

Dr. John Randall, Judge Co-chair **President of Zyvex Labs and Adjunct Professor, UT Dallas**

John Randall has 35 years of experience in nano-fabrication. He is President of Zyvex Labs, Exec VP of NanoRetina, and Adjunct Faculty at UT Dallas. He joined Zyvex in March 2001 and was instrumental in developing and spinning out two successful nanotechnology companies, Zyvex Technologies and Zyvex Instruments. Before Zyvex, Randall worked for 15 years at Texas Instruments where he worked in high-resolution processing for integrated circuits, MEMS, and quantum effect devices. Previously, he worked at MIT's Lincoln Laboratory on ion beam and x-ray lithography. He has 109 articles published in refereed journals. He has a BS, MS, and PhD all in electrical engineering from the University of Houston, where he was elected distinguished engineering alumni in 2010. Randall was also elected distinguished member of the Technical Staff while at Texas Instruments, is a Fellow of the IEEE and a Fellow of the Society of the AVS.

Tanis Cornell, Judge Co-chair **EWF International, CEO**

In January of 2018 Tanis became the CEO of EWF International after leading the Dallas market for the previous five years. EWF is a leadership development company focused on increasing the representation of women in the executive ranks. EWF leads and facilitates peer advisory forums for female senior executives and business owners, provides training programs for emerging leaders, and conducts workshops and corporate training programs. Her background spans key leadership roles in the technology sector where she served as an equity partner and Board member of the private software company PhaseWare, an officer level position in the Fortune 1000 telecommunications company WilTel, VP of sales for Level 3 Communications and led one of the largest service provider partnerships for Fortune 500 data management company, NetApp.

Brenda Boehm **Principal, Board Governance and Advisory Services**

Brenda has held executive and board positions with technology companies from entrepreneurial start-ups, such as Starent Networks, to Fortune 100 leaders Cisco, Nortel, Alcatel-Lucent and Nokia. Her deep set of experiences and skills have equipped her with the market vision that recognizes how industry disruption can be harnessed to propel innovation, develop global markets and institutionalize operational success. Brenda attended Stanford University's Graduate School of Business Executive Program, holds a MS from SMU's School of Engineering in Telecommunications and earned a BA in Computer Information Systems from the University of Louisiana.

JUDGES

Greg Carr

CARR Law Firm PLLC , Managing Partner/Owner

With more than 25 years of experience, Greg Carr practices intellectual property law, including domestic and foreign matters and proceedings before federal courts, the Trademark Trial and Appeal Board, and the Board of Patent Appeals and Interferences. Greg formerly co-chaired the law student committee of the Dallas Association of Young Lawyers. He is also adjunct professor of law and economics at Southern Methodist University and currently serves on the Board of Advisors for its Mechanical Engineering Department. A graduate of Leadership Dallas, Greg has served on the organization's Alumni Association Board of Directors and spearheaded its effort to build a pavilion and recreation area for the Bon Ton neighborhood, located near the Trinity River Corridor in southeastern Dallas.

Jack Carter

Shinobi Group, Founding Partner, Technology Principal

A dynamic technology ninja with more than 25 years of diverse technical and leadership experience – in defense, telecommunications, medical diagnostics, financial services, security, consumer products, e-commerce and beyond. Jack embodies that rare professional who can seamlessly move between different “sides” of the house: from technology to brand, operations to finance, ideation to execution.

Hyacinth DeAlmeida

Ericsson Inc., Vice President Corporate Development

Hyacinth DeAlmeida is head of Ericsson's M&A activities for its North American region, leading the region's efforts to identify, evaluate, prioritize and execute external investment opportunities to support the region's growth ambitions. He has more than 30 years of telecom industry experience in various functions including engineering, marketing, finance, business development, strategy and M&A. Prior to joining Ericsson, Hyacinth held various positions at Nortel Networks (including VP Corporate Development and President of Nortel Ventures LLC), SaskTel and Telecom Canada. Hyacinth holds a bachelor's degree in electrical engineering from the University of Alberta and an MBA from the University of Regina.

JUDGES

Tricia D'Cruz **Catalyze Dallas, Managing Director**

Tricia D'Cruz is an experienced senior executive, strategy consultant, venture capitalist and board member. She has been a leader to growing high technology companies for more than 30 years, with a track record of achieving accelerated growth. Tricia is co-founder at Catalyze Dallas, a venture development firm that starts and funds new companies to commercialize innovations sourced from the defense industry. Prior to Catalyze, Tricia founded VectorPoint, a strategic growth consulting firm servicing early stage and mid-market technology companies in DFW. Tricia has held divisional P&L responsibility at global public companies including Tekelec and Siemens. She has also excelled at numerous early stage ventures including as EVP of Efficient Networks from early stage through successful IPO and exit.

Robert Fitzgerald **Deloitte, Partner**

Robert Fitzgerald is the Audit and Advisory practice leader for the Technology, Media & Telecommunications (TMT) industry group for Deloitte in North and Central Texas. In addition, Robert is responsible for overseeing service delivery to clients in the TMT industry group for Deloitte, where he has been a partner for more than 15 years.

Stacie Hyatt

Stacie brings more than 15 years of experience in the medical and research technology arena to the table. She has worked for industry giants including Medtronic and St. Jude Medical, as well as successful early stage and start-up companies, primarily in the cardiac, neurosurgical and wellness disciplines. Her geographic experience spans the globe, including having worked for several years in Europe. Ms. Hyatt earned her bachelor's degree in bioengineering from Texas A&M University and an MBA with a triple focus in marketing, operations and health care from The Wharton School at the University of Pennsylvania.

JUDGES

Alicia Makaye

GXA Network Solutions, VP

As a VP at GXA, Alicia is a key decision maker who serves as a problem solver and advocate for the organization. As the overseer and developer of human resource functions, Alicia's responsibilities include interviewing, recruiting, hiring, and managing employees. She also assists in organizational development, personnel development, team building, employee management and planning. Alicia has volunteered her time in the community and with GXA's global missionary outreaches and has traveled to countries such as South Africa, Kenya, Mexico and Swaziland. Locally, Alicia volunteers her time at universities and other organizations to help students and adults looking for employment. Alicia has a master's degree in human resource management and a PhD in public affairs from UT Dallas.

Sha-Chelle Manning

Pioneer Natural Resources, Director of Innovation

Sha-Chelle Devlin Manning is the director of innovation and enterprise integration for Pioneer Natural Resources, a large independent upstream and midstream oil and natural gas company. Manning is one of the co-founders of Malibu IQ, an investment partnership consisting of HRL Laboratories, commercializing the inventions of the more than 300 global leading scientists and technologists. Manning serves on the Texas Emerging Technology Fund Advisory Committee and formerly led Texas' nanotechnology strategic initiatives, resulting in \$500M in investments and scaling of advanced technologies. Sha-Chelle brings a wide range of experience in management and executive strategic consulting for Lockheed Martin, HRL Labs, Zyvex Labs and Texas A&M University focusing on high-technology solutions or services.

Vance McCollough

Audit Partner

Vance has more than 25 years of experience working with technology companies in various stages, from emerging startup operations to well-established, multinational organizations. He spent 10 years in Seattle during the formative years of internet technologies working with clients such as RealNetworks and Starwave. In 1999, Vance moved to Texas, first arriving in Austin and then moving to Dallas in 2002. His specialties include advising companies with issues related to operations, mergers and acquisitions, financial reporting, internal controls, revenue recognition, business combinations and share-based compensation. In addition, he has assisted companies through the process of initial public offerings and private equity buyouts. Vance holds a Bachelor of Science, accounting from University of Southern California.

JUDGES

Lin Nelson

Lin Nelson is a recognized innovator with 15+ years of experience developing technology-based businesses, delivering fact-based analysis & leading operational strategies. Most recently she served as market development advisor for IBM; consulting as a trusted advisor with senior leadership across IT services segments. Lin founded NelsonCFO, a consulting company that worked with early stage, tech-focused, venture-capital-backed companies in medical device, Biotech, IT hardware & software services. Nelson has served as an adjunct at Babson College, teaching entrepreneurship. Nelson earned her BS in finance from University of Texas-Arlington and an MBA with a focus in entrepreneurship from Babson College in Wellesley, MA, where she was the Price Babson Fellow for two years.

Andrew Olowu **Axxess, CTO**

Andrew Olowu is chief technology officer at Axxess, a national leader in home health management software, and serves on its board of directors. Olowu is responsible for the overall technology, architecture and innovation of the Axxess platform. He recently was named the recipient of the Tech Titans Corporate CTO Award for his exceptional technical leadership, which fosters the development of new technology and innovations, resulting in significant value for both Axxess and the healthcare industry.

The anatomy of innovation.

Brains and heart.
Strategy and creativity.
Personal and professional commitment.

We can relate. Thanks to the innovators for giving it their all!

MCC

JUDGES

Dustin Osgood **PricewaterhouseCoopers LLP, Partner**

Dustin is a partner at PwC focused on helping clients address risk, governance and compliance through the use of technology and analytics. He has worked with some of the largest and most innovative technology companies in the world while living in New York, London and Tokyo.

Paola Saibene **Flowserve**

Paola Saibene oversees data protection and data privacy for Flowserve Manufacturing and Supply Chain. Previously, she was the CEO of TXYSAI, a technology consulting company. She has 22 years of IT-practitioner experience, having held multiple C-level roles in multi-billion dollar organizations. Paola blends her technology experience with her psychology and literature post-graduate degrees, bringing an ecosystem approach to the evolving digital era.

Hubert Zajicek **Health Wildcatters, CEO**

Hubert Zajicek, MD, MBA, is CEO & co-founder of Health Wildcatters, a healthcare seed fund and accelerator in Dallas. Dr. Zajicek has extensive experience with startups and is an active speaker, panelist and thought leader on healthcare innovation, startups, entrepreneurship & financing. He serves as advisor, mentor and board member on various organizations and startup companies. He was managing director – medical technology at NTEC (North Texas Enterprise Center), where he ran what eventually became the Southwest's largest medtech investment conference, showcasing startups that attracted in excess of \$300M. He is president and founder of the Society of Physician Entrepreneurs – DFW chapter, co-founder & partner of Lone Star Angels and is on the Board of the Southwest Venture Forum. He has an MD from the University of Vienna and an MBA from SMU.
