CHAIR OF THE BOARD REPORT

Dear Colleagues and Friends,

Leading an organization during a period of transition is always challenging, but rewarding. That is just how I feel about my role as the Chair of the CCID for the past academic year. Starting with the strategic action planning sessions in Vancouver in the Summer of 2000, venturing across the border to Monterrey, Mexico, and then to the East-meets-West Summer Seminar with the Japanese Junior College Presidents in Hawaii this past July, we showed that we can truly be international and have a lot of fun in the process!

The "transition" that I am referring to is in terms of our organizational operating culture. We are moving steadily in the direction of an entrepreneurial organization, competing actively for grants and contracts, nationally and internationally. We have had some major successes and identified many potential opportunities. We learned some tough lessons about investing our collective energy and efforts, and coming up empty, not through our fault, but due to politics and other circumstances totally beyond our control. But the chase goes on, and we must remain aggressive in our pursuit of opportunities that are appropriate to our mission.

The Community Colleges which comprise our organization have incredible assets - both in human resources of experienced faculty and administrators, as well as in our curricular resources. We truly have an opportunity, in these dawning years of the twenty-first century, to contribute to international development.

CCID is building its reputation internationally as a source of expertise and technical assistance. Our India Project, our seminal efforts to assist Thailand's move toward its own version of "community colleges," the ADB funded project in the Republic of the Marshall Islands, the Korea Manpower Agency Project, the Engineering Consulting Firms Association Training Progress, are only a few of the opportunities open to us. The more we do, the more we learn, the more we thrive.

I am grateful for the leadership and commitment of my fellow Board members and the hard work of the IED's. And, we certainly cannot forget to thank the Stanley Foundation and the personal inspiration provided by Jack Smith. A big and warm Mahalo Nui Loa (Thank you very much)...

Joyce S. Tsunoda
Senior Vice President,
University of Hawaii &
Chancellor for Community Colleges
University of Hawaii
THE EXECUTIVE COMMITTEE
This year the Executive Committee met eight times via conference call. The dedication of this group of college presidents to the goals of CCID is exemplary, and is reflected in the time and commitment they make to the organization.

They continue the role established earlier of offering advice and guidance to the Executive Office. With the pace of activities increasing, the Executive Committee provides invaluable leadership and assistance prioritizing. From the routine, such as making recommendations for conference venues, to challenging topics such as membership issues, or project priorities, their advice has been consistently wise.

An additional benefit to the organization is that a growing group of college presidents have a deeper understanding of the challenges involved in the day to day activities of international contract training.

BOARD OF DIRECTORS
The CCID Board of Directors met for their two meetings during the year at the Summer Institute and the Annual Conference - in Vancouver, Canada and in Monterrey, Mexico. They also tackled challenging issues. In Vancouver, through a wide-ranging planning process they addressed member college commitment and involvement in activities. Indirectly from this process emerged the new committee structure. They also assertively reviewed CCID finances and implemented a new plan - with a capital fund established for project development. In Monterrey project issues, project priorities, training of members and other internal issues held their attention.

The Board accepted Greenriver Community College, WA, to full Member status. Pitt College, NC, Universidad Regiomontana, Mexico, Roskilde College, Denmark, Lee College, TX, Nova Scotia Community College, Canada, Ridgewater College, MN, Houston Community College, TX, Red Rocks Community College, CO, Lakeland Community College; OH and Mississippi Gulf Coast Community College all joined CCID as Affiliate Members.
THE YEAR IN REVIEW

John Halder  
President / Executive Director

A year ago CCID was steeped in the details of writing for a World Bank project in the Lebanon. Much has happened in the intervening months, not least of which was that we won the project. Disappointingly, the contract was not awarded by the Lebanese Government. From this and other such trials however, CCID has grown in both strength and depth, and this is one the major themes that run through this year’s report. We are better for the experience – stronger, more finely tuned, greater capacity and more responsive. Here are some of the reasons why.

Through the process of gathering data about needs assessment and workforce development from our member colleges, we have created a database of consultants that is enviable. And because we developed that database, it forced us to review our other databases, and to evaluate their strengths and weaknesses. And through the process of writing, we learned about our overall institutional strengths and weaknesses. And we learned what capacity building we need in order to manage such a project. The outcome is that today CCID is much better prepared to tackle the projects ahead.

Other activities that have added to our capacity have included writing for a USAID Indefinite Quantity Contract. Although in the end we did not submit this proposal, it again forced CCID through organizational challenges that have contributed much to our strength and growth.

The following lists just some of the activities that took place last year, categorized as external or internal:

External

- Contracted with Universitas, UK, to write on the US and Canadian vocational and technical systems.
- Contracted with the Korea Manpower Authority for training.
- Contracted with INTEM (Japan) to contribute consultants for TEVT reform in the Philippines.
- Extensive meetings with Thai educational reformers.
- Sent a major CCID delegation to India to visit four southern states.
- Planned (and shelved) an Innovator Conference.
- Met with the Frontline Group and gained an assurance of their participation in member college Nigeria activities.
- The joining together of all the Barents Sea proposals ($1.5m total) into a comprehensive package to seek funding.
- Discussions with the Eurasia Foundation about funding Barents Sea activities.
- Working with Asian Institute of Development Studies in bidding on a Sri Lanka project.
- Sub-contracting with the Asian Institute of Development Studies on training of Pakistani higher education officials.
- Extensive use of US Department of Commerce officials for networking through Asia.
• Conducted a major seminar for Asia Development Bank officials on the capabilities of community colleges.

• Participated in a major higher education reform conference at Harvard University, focused in Latin and South America.

• Signed MOU’s with the Korea Manpower Agency (KOMA), with the Engineering Consulting Firms Association (ECFA), Japan, and with ORACO Consulting, Canada.

Internal
• Developed a major International Education Director Training Program.

• Had a highly successful Summer Professional Development Program in the European Union.

• Selected and presented the Wernier Kubsch Award.

• Created a major new organizational structure for CCID that builds Member and Affiliate college participation, and also gives greater strength to the organization.

• Received nine new colleges into the organization.

• Played a major role, in conjunction with AACC, the Stanley Foundation and ACIEE in producing a Satellite Video Conference.

• Cooperated with AACC, ACT and ACIEE in developing a joint international education legislative agenda.

• Participated in Summit III, hosted by the Stanley Foundation; reviewing the activities of the major international education community college organizations.

• Planned Annual Conference and Summer Institute venues out to July 2004.

• Conducted the CCID Summer Institute, Vancouver and the CCID Annual Conference, Monterrey, Mexico.

• Major overhaul, and growth, of the CCID databases of consultants.

An Organizational Structure to meet the Challenges
Three years ago CCID established the Executive Committee, comprising five presidents elected from the Board of Directors. This year the organization and structure of CCID has been modified again to reflect the changing challenges. We have created Regional Committees, Discipline Sub Committees and Task Sub Committees of the Board.
While some of these ad hoc committees exist mainly in concept, others are forging ahead with projects and activities. The Aviation, India, Latin America, Workforce, Development and Agriculture sub-committees in particular are moving forward aggressively. The Board has recognized that such committees involve members in the day-to-day management and operations of CCID in a way that has not occurred in the past. These sub-committees also provide opportunities for Affiliate colleges to be involved – we invite them to contact the Executive Office for more information.

**Assertive Marketing**

The printing of project reports has been a highly beneficial way to showcase the activities of member and affiliate colleges. We now have a series of these reports available for members to use.

The production of the Workforce Development Case Studies outlining the work of a college in workforce development, has been warmly received by international clients.

We have continued our focus on specific regions of the world, with India, the Caribbean and Asia receiving particular emphasis. Signing Memoranda of Understanding with ORACO, a Canadian consulting company, the Korea Manpower Agency, and ECFA – the Engineering Consulting Firms Association of Japan, are reaping dividends as all also fit within the CCID regional goals.

During the past year we sent a delegation to India, led by President Emeritus Dave Ponitz of Sinclair Community College. Other members of the group included IED's from Sinclair and Eastern Iowa Community College District, an industry representative from
Deere & Company, and a specialist in corporate training from Eastern Iowa. They traveled to four Indian States, and met with the US Ambassador. Follow-up work continues, with grant potential on the horizon.

In the Caribbean / Latin America we developed closer ties with the Inter American Development Bank, resulting in various prospective activities. Being invited to participate in Inter American Bank discussions on Latin America at a Harvard University Conference, has enabled CCID to learn, grow and build new liaisons.

In Asia we presented a workshop for the Asia Development Bank on the capabilities of community colleges, as well as building closer ties with various NGO's in the region. The latter has resulted in project work in the Philippines, Pakistan and elsewhere. ADB has requested further workshops.

We have been deeply involved in work with Thailand, assisting in their development of community colleges, a relationship that continues to grow. And we plan to be on a US Department of Commerce Trade Mission to Thailand and Malaysia later this year.

In summary, the year has been productive and rewarding, with an increasing level of activities for members.
ACTIVITIES AND SERVICES

Professional Development

Our Professional Development programs continue to grow, both in terms of participation and quality. Now in its third year the overall program continues to be coordinated by Professor Robert Keener of Sinclair Community College, Ohio. With his team of international education directors making selections and recommendations to the Board of Directors, they have now put together a program to year 2004.

During the past year a group of 31 faculty and administrators, led by Sinclair Community College, visited the European Union. In the current year a group of 25 will be traveling to China, followed in 2002 by “Exploring Greece and Turkey: Historic Rivals in the Middle East,” “British Culture and American Heritage” in the summer of 2003, and in the year 2004 “The Italian City as a Classroom.”

The Professional Development Program is becoming a jewel in the CCID crown, thanks to the willing involvement and participation of all concerned.

Faculty Exchange Program

Due to the changing nature of the experiences valued by the CCID membership, the Board of Directors determined that the longstanding Faculty Exchange Program with Eastern Europe has run its course. With regret and sadness we did not initiate any activities this past year, while acknowledging that many hundreds of persons and institutions, both in the US and overseas, have gained immeasurably from the program.

Visa Assistance

CCID continues to have authority from the US Department of State to issue the paperwork to authorize visiting faculty to CCID colleges from overseas. During the past year we issued IAP – 66 paperwork for 25 colleges, a slight decrease from the 28 of the previous year.

Travel Insurance

We continue to offer travel insurance service to CCID colleges that request it, providing 72 individuals with Travel and Medical Evacuation Insurance to be used in the event of accidents, up from 61 issued in 1999 – 2000.

Live Satellite Videoconference

We worked with colleagues from our sister organizations – AACC and ACIE to produce our first live satellite videoconference. With generous support from the Stanley Foundation, "International Students: Recruiting, Retention and Support" was directly received by over 100 down-link sites across the nation. We estimate that over one thousand participants took part in the program.
Werner Kubsch Award

The Year 2001 Werner Kubsch Award winner was Francisco Bertot, Director of the Center for Excellence at Rancho Santiago Community College District. Francisco's remarkable career in the international domain is documented on the CCID website at www.ccid.kirkwood.cc.ca.us and he is a richly deserving recipient of this award. The award is presented annually to a person in the community college family not just a CCID college who is judged by his or her peers to have excelled in the international domain. The award is named after Dr. Werner Kubsch, a German who came to recognize the value and worth of the US community college system.

The CCID Website
Ms. Theresa Mikulas in the CCID Executive Offices, has in the past year undertaken training so that revisions, changes and deletions to the website can now take place in a timely manner. The website performs multiple purposes: keeping members informed of events, providing an historical record of activities, and serving as a marketing tool for CCID. During the past year it received 127,132 hits.

Annual Conference
The Annual Conference took place in Monterrey, Mexico, and was hosted by the Universidad Regiomontano. Located in the historic city center of Monterrey, the conference provided opportunities for bridges to be built between our countries and Mexico. Attendance at 240 was acceptable, given that the venue was more challenging to reach than on some other occasions.

Summer Institute
The Summer Institute was hosted by the British Columbia Institute of Technology, Vancouver, British Columbia, and opened new horizons for working with Canadian colleagues. Learning about the role of the indigenous cul-
tures of the region was one of the more interesting challenges presented; while another challenge included a hotel worker strike that meant that the meeting venue changed a few days prior to arrival.

**International Education Director Training**

This has the potential to develop into a key CCID service and product. Although a large turnover of IED's has created some special challenges, their commitment has been exemplary.

The introduction of the Three Level Training Program, to provide a comprehensive training to IED's in the field of contract training, has been highly praised as being innovative and unique.

**Level One** – an introduction to Washington DC and the Federal Agencies has taken place.

**Level Two** – to be provided by The Institute of International Education – is ready to take place.

**Level Three** is currently being developed.

The outcome will be IEDs with training in all aspects of evaluating their own institutional strengths, identifying the correct agency to work with, developing their own institutional strategy for winning projects, and understanding the niceties of working and contracting in the international domain. We anticipate that an IED will continue the training through all three levels with the same cohort, since the teambuilding that results is important. We also anticipate repeating the program on an annual basis.

The introduction of the IED Mentoring Program has provided each with a person to whom they can turn for professional advice.

**Involvement by the Members**

Members were active to an unprecedented degree over the past year. Their activities with CCID can be grouped as follows (with apologies to colleges misplaced or omitted):

**Agriculture Sub Committee**
Kirkwood, EICCD, Hinds, Hawaii, Hillsborough, Coast, Pima, State Center, Delaware Tech.

**Africa Sub Committee**
St. Louis, EICCD, Houston, Highline

**Aviation Sub Committee**
RMIT, Greenriver, Hawaii, City College San Francisco, Coast, Hinds, State Center, Seattle, Delaware County, St. Louis, Greenriver, RMIT

**Asia Sub Committee**
Hawaii, Allegheny County, Seattle, RMIT, Humber, Greenriver, St. Clair

**Assistance to the Executive Office**
Kirkwood, Howard, Sinclair, Delaware County, EICCD, Hawaii
Barents Sea Programming/
Russia Sub Committee
Hinds, Daytona Beach,
Northampton, Monroe, Broome,
Rancho Santiago, Hawaii, Greenriver.

Hillsborough
The future for CCID has never looked better. Never has the demand for our products and services been higher.

The Board of Directors and the Executive Committee are dedicated, and our members are committed. With the training of new IED's producing outcomes, and the new organizational structure becoming effective, CCID is a renewed force in the field of international training.

The benefits, as always, accrue not only to our overseas clients, but also to the community and technical colleges that are part of who and what we are.
