FOREWORD

July, 1993

Established in 1976, CCID has consistently been at the forefront of international education. Consulting, foreign economic development activities, and overseas college relationships are just some of the consortial initiatives that the membership may participate in. This Third Annual Report demonstrates the consortium’s commitment to international education.

The following pages identify the membership’s participation in international activities. Two key facets of membership activities make this point. First is the extent of the membership’s activities outside CCID. In addition to CCID activities, the membership is encouraged to develop and pursue their own international agenda. Consortium colleges are currently engaged in fifty-five non-CCID activities.

Secondly is the extent that member colleges have obtained external funding to support their own international activities. CCID colleges obtained more than $6.2 million from outside sources this past year which is an increase of 214 percent over the previous year. During this period of tight financial resources, these external funds are welcome additions to the college budgets.

The diverse activities depicted in this report pinpoint the vitality of the consortium and its commitment to international education. Membership participation in whatever form or level of involvement is indicative of the consortium’s and individual college’s leadership in the global arena.

CCID’s twenty full members and thirty-nine affiliate members are pleased to showcase their international achievements of this past year.

Sincerely,

Robert Keener
Co-Editor

Community Colleges for International Development

Profile

The Community Colleges for International Development, Inc., (CCID) is a consortium of 20 members and 39 affiliate community colleges in Canada and the United States. Created in 1976, CCID implements international programs and projects which benefit other countries as well as its own member institutions. Incorporated as a nonprofit consortium, CCID is administered by an Executive Director and governed by a Board of Directors consisting of the presidents of the member colleges. With a combined enrollment of more than 750,000 students, these colleges offer more than 300 programs in technical/vocational subjects plus university parallel and community service programs.

The Objectives of CCID

The purpose of the Community Colleges for International Development is to identify, develop, and expand mutually beneficial international relationships which contribute to the improvement of college programs and services. CCID provides mid-level manpower training and technical assistance in occupational, vocational, and technical education to developing nations throughout the world. CCID will accomplish its purpose through the pursuit of the following objectives.

A. Internationalization of the curriculum.

B. Assistance to other countries in mid-level manpower training and technical/vocational education.

C. Opportunities for international study, exchange and professional development to students and faculty of community colleges and cooperating overseas institutions.

D. Leadership and services in the development of international education in U.S. and Canadian community colleges.

E. Help promote world understanding and cooperation through educational linkages.

F. Share human resources and educational expertise with other countries having similar educational interests and concerns.

Consortium Activities

1. Technical Training

Long-term (generally six months or longer) and short-cycle mid-level training programs are conducted abroad or at CCID colleges throughout the year. Interested countries request on-site technical assistance or send representatives to visit one or more of the member colleges to design programs to meet their specific needs. Modern, well-equipped instructional facilities are available at the colleges, and working agreements with local businesses and industries make hands-on training feasible. CCID colleges have extensive experience with family home stays and "experience America" components.
2. Consulting
CCID colleges have recognized leaders in occupational, vocational, and technical education. Consultant services are available in curriculum planning, development, and evaluation; faculty and staff development; instructional design and evaluation; educational planning; management training; design of physical facilities; identification, procurement, and utilization of instructional equipment.

3. Bilateral Agreements
CCID enters into bilateral agreements with ministries of educational, educational consortia, and individual educational institutions. These agreements allow for the joint development of projects which may be funded by the parties, governmental agencies, or other external sources. Activities have included faculty and cultural exchanges, vocational teacher training, faculty training workshops in the U.S. and abroad, technical education, curriculum development, and educational needs assessments. CCID has current active agreements with the Republic of China (Taiwan); Association of Colombian Universities; the Republic of Suriname; Supreme Council of Egyptian Universities; Technical University of Budapest; and Czech Technical University.

4. International Students
Students from other countries find many programs and geographic areas from which to choose. They may pursue a two-year degree or certificate, or complete the first two years of a bachelor’s degree at a fraction of the cost it would take at a four-year institution.

5. International Visitors
CCID colleges host visitors from all over the world who are interested in observing the community college in operation. CCID will coordinate the itineraries of individuals and groups who wish to visit more than one college.

6. Conferences and Seminars
CCID hosts two conferences each year on international education and the community college. The winter conference is open to the international education community and features recognized authorities and practitioners from around the world. The summer invitational conference is primarily for community college presidents, trustees, and senior administrators.

CCID also sponsors special seminars at the request of clients or to meet the needs of its membership.

7. The Werner Kubsch Award for Achievement in International Education
CCID sponsors this award, which is presented annually to a community college educator who has demonstrated outstanding achievement in furthering international education within the community college.

8. Fellowship in International Education
This fellowship is a $2500 competitive award given annually to a full-time faculty member of a CCID member or affiliate institution for outstanding service in the advancement of international education. The award is based partially on a project which the recipient proposes and partially on present and past contributions to the field.
Organization

The consortium operates under the coordination of an Executive Director who administers programs and projects. Direction is given by the Board of Directors made up of the presidents of the member colleges. Each member and affiliate college provides an International Education Director who coordinates CCID activities at the local level. Consortium activities are funded by: membership dues, government grants and contracts, foreign government contracts and projects, foundation grants, conferences, and other project activities.

Current Initiatives

1. CCID has, since 1979, participated in a bilateral education agreement with the Republic of China (Taiwan). The current agreement expires in 1996. It provides for technical and English language workshops in Taiwan instructed by faculty from CCID colleges; technical training of Chinese faculty through short-term assignments in the U.S.; exchange of educational materials, and exchange orientation visits by Chinese and American college presidents and trustees.

2. CCID also participates in a bilateral education agreement with the Republic of Suriname. The agreement provides for assistance in vocational/technical training and education including programs for teachers and administrators. One method used for teacher training is the attendance of individual Surinamese students at a CCID college for a two-year technical or vocational degree, followed by a year of teacher training for the whole group at one designated CCID college. Another program is the enrollment of students with industry-acquired vocational skills as teacher-interns at a CCID college. CCID faculty have also conducted workshops in Suriname on computer utilization, home economics, adult education, and machine shop training. A recent project sent CCID faculty to Suriname in the summer of 1991 to present courses to vocational faculty as part of a system-wide educational upgrade program. Funding for these activities has been provided by the Republic of Suriname, the Organization of American States and the Alcoa Foundation.

3. CCID signed an agreement of cooperation with the Technical University of Budapest (TUB) in 1987. Faculty exchanges began in August 1987. We are now in the sixth year of active exchange and faculty development programs. Fifteen TUB faculty and twelve CCID faculty have served exchange assignments of at least one semester. Additionally, 29 CCID faculty have attended summer faculty development seminars at TUB, under the joint sponsorship of CCID and TUB.
4. Since 1987, CCID has conducted an active exchange program with Czech Technical University in Prague, under an agreement similar to the TUB agreement. This was partially funded by a USIA University Affiliation grant.

5. In September, 1990, CCID signed agreements of cooperation with the University of Veliko Turnovo in Bulgaria, the University of Bucharest, and the University of Craiova in Romania. Faculty exchanges began in September 1991.

6. CCID has experience in scheduling and managing seminar/study tour itineraries in the United States and Canada for both individuals and groups. These have included officials from the five Eastern Europe universities mentioned above, a delegation from the Supreme Council of Egyptian Universities, delegations of presidents from Taiwan technical colleges, and a delegation of Indian educators and government officials. Dr. Lazar Vlanescu, Secretary of State from the Romanian Ministry of Education and Science visited CCID colleges in April 1991.

7. In August 1989, three CCID presidents traveled to Kazan, Russia, and initiated a relationship with Russian educators that has caused a variety of educational activities in each of our nations. The most prominent outcome of the affiliation occurred in November 1993 with the official opening of a community college in Kazan, Tatarstan. We are continuing our relationship with the goal of strengthening the Tatar American Community College and causing it to be a pilot demonstration of an educational and economic development asset to that area that can be replicated in other parts of Russia.

The above addresses only major programs and linkages developed and coordinated by CCID on behalf of its members and affiliates. Our 59 colleges have extensive individual linkage agreements, including sister colleges in many countries, arrangements for study abroad, faculty exchanges, and other international education activities. CCID conducted contract training, technical assistance, and other international activities for more than 35 countries within the past five years.
