

iWebKit

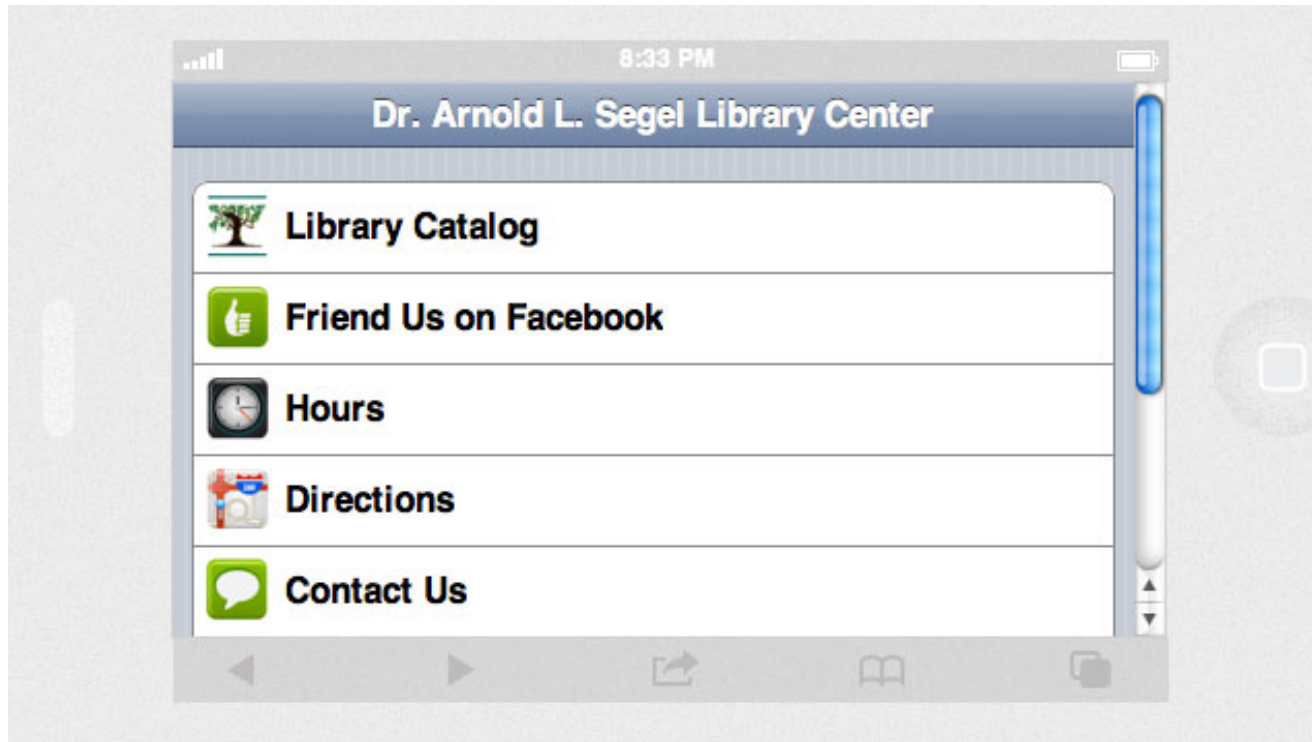

- Easy to use framework
- Available free for non-commercial use
- New version under development

My Prototype

- Built using iWebKit
- Web app - compatible with all mobile devices
- Offers access to only key library resources
- Link to full website
- Completed in a single day

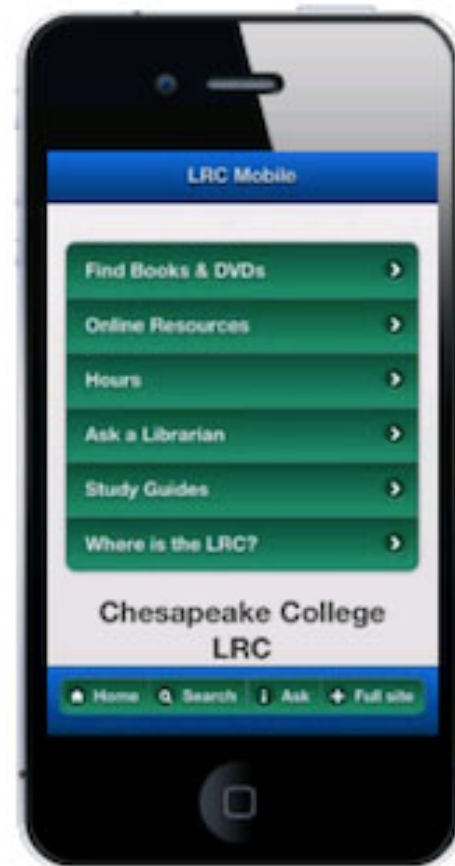

Landscape View

- Combines dynamic and static content
- Focused on the information users will want while using a mobile device

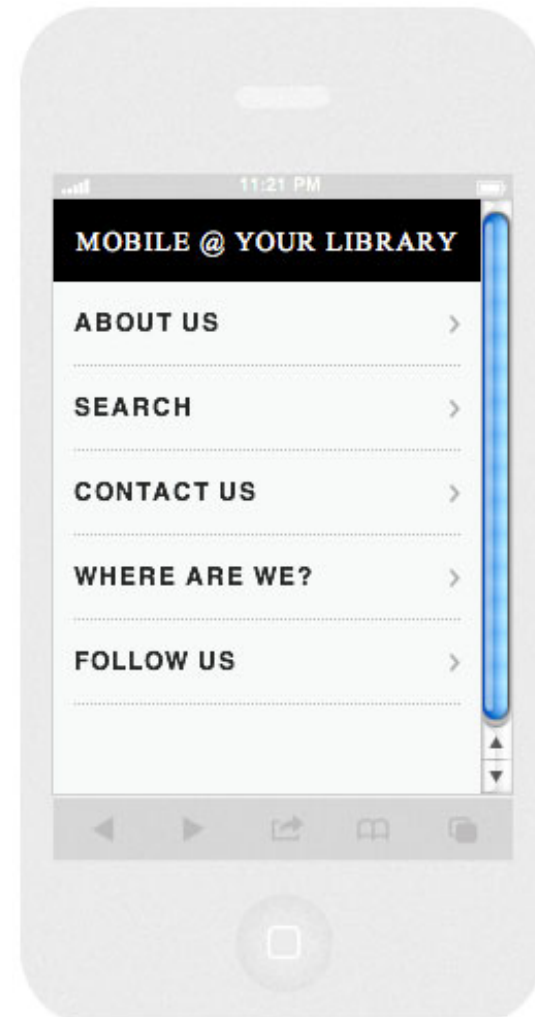

Mobile Framework by Eric Phetteplace

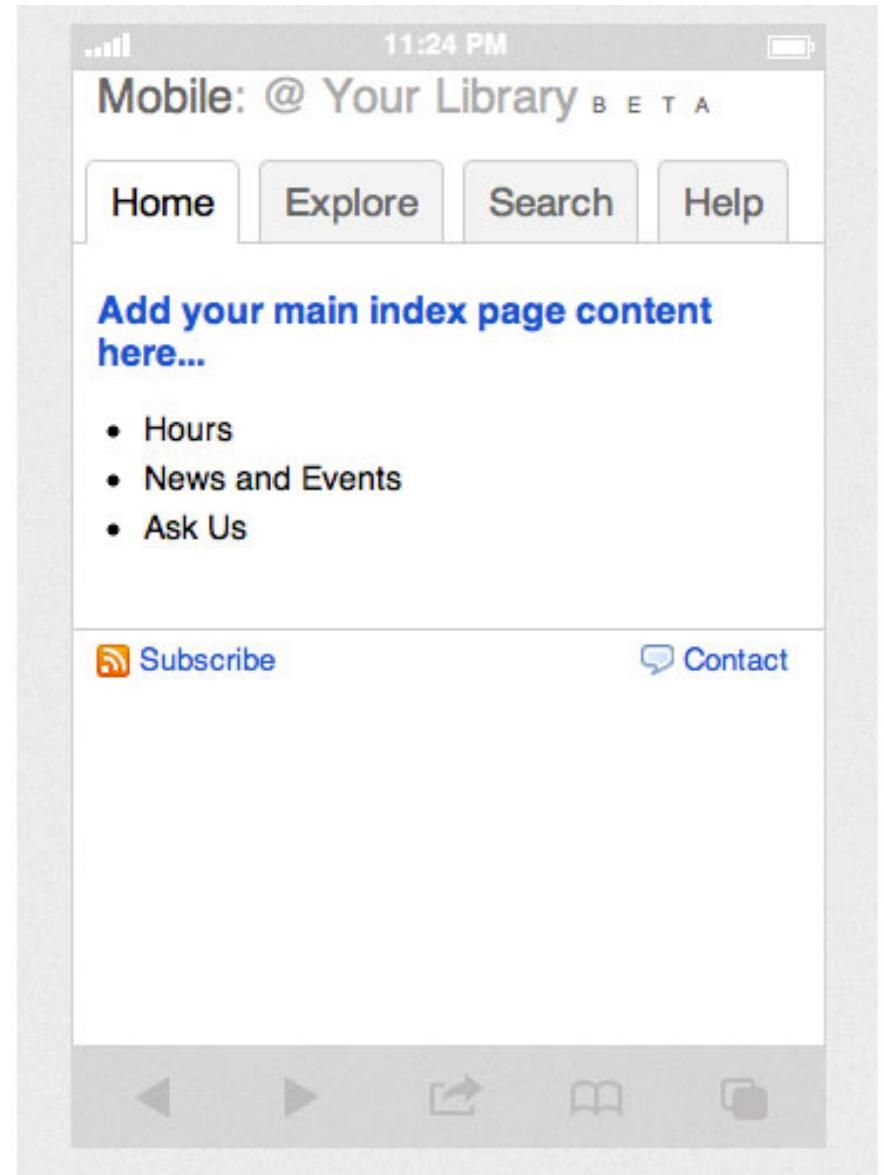

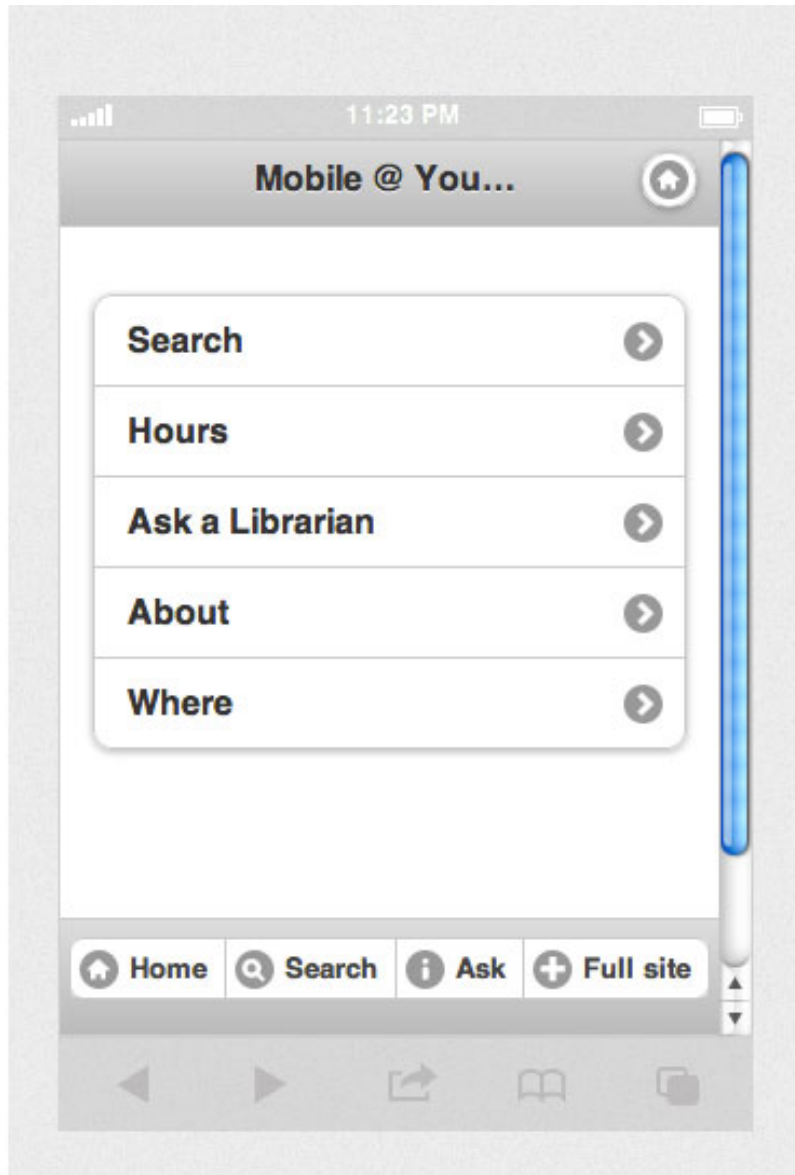

- Started with Jason Clark's framework
- Built using JQuery Mobile
- Web app - compatible with all mobile devices
- Available on GitHub
(<https://github.com/phette23/Chesapeake-College-LRC-Mobile-Site>)

Mobile Frameworks by Jason Clark

- 3 available frameworks
- All highlight the key features of the library site
- Options for various types of libraries/patrons

One-Pager by Influx

- Mobile-optimized
- Made to fit a wide range of screens
- Easy to use
- Good option if you want a website for both mobile and non-mobile audiences
